**The Reviewer's Guide to Quantitative Methods in the Social Sciences** Gregory R. Hancock, Laura M. Stapleton, Ralph O. Mueller, 2018-11-15 The Reviewer s Guide to Quantitative Methods in the Social Sciences provides evaluators of research manuscripts and proposals in the social and behavioral sciences with the resources they need to read understand and assess quantitative work 35 uniquely structured chapters cover both traditional and emerging methods of quantitative data analysis which neither junior nor veteran reviewers can be expected to know in detail The second edition of this valuable resource updates readers on each technique s key principles appropriate usage underlying assumptions and limitations providing reviewers with the information they need to offer constructive commentary on works they evaluate Written by methodological and applied scholars this volume is also an indispensable author s reference for preparing sound research manuscripts and proposals

**Causality in a Social World** Guanglei Hong, 2015-06-12 Causality in a Social World introduces innovative new statistical research and strategies for investigating moderated intervention effects mediated intervention effects and spill over effects using experimental or

quasi experimental data The book uses potential outcomes to define causal effects explains and evaluates identification assumptions using application examples and compares innovative statistical strategies with conventional analysis methods Whilst highlighting the crucial role of good research design and the evaluation of assumptions required for identifying causal effects in the context of each application the author demonstrates that improved statistical procedures will greatly enhance the empirical study of causal relationship theory Applications focus on interventions designed to improve outcomes for participants who are embedded in social settings including families classrooms schools neighbourhoods and workplaces

Analysing Intersectionality Keming Yang,2023-11-18 Innovative and practical this is the perfect methods book for anyone looking to apply intersectionality to their research and their multifaceted data *Statistical Methods in Psychiatry and Related Fields* Ralitza Gueorguieva,2017-11-20 Data collected in psychiatry and related fields are complex because outcomes are rarely directly observed there are multiple correlated repeated measures within individuals there is natural heterogeneity in treatment responses and in other characteristics in the populations Simple statistical methods do not work well with such data More advanced statistical methods capture the data complexity better but are difficult to apply appropriately and correctly by investigators who do not have advanced training in statistics This book presents at a non technical level several approaches for the analysis of correlated data mixed models for continuous and categorical outcomes nonparametric methods for repeated measures and growth mixture models for heterogeneous trajectories over time Separate chapters are devoted to techniques for multiple comparison correction analysis in the presence of missing data adjustment for covariates assessment of mediator and moderator effects study design and sample size considerations The focus is on the assumptions of each method applicability and interpretation rather than on technical details Features Provides an overview of intermediate to advanced statistical methods applied to psychiatry Takes a non technical approach with mathematical details kept to a minimum Includes lots of detailed examples from published studies in psychiatry and related fields Software programs data sets and output are available on a supplementary website The intended audience are applied researchers with minimal knowledge of statistics although the book could also benefit collaborating statisticians The book together with the online materials is a valuable resource aimed at promoting the use of appropriate statistical methods for the analysis of repeated measures data Ralitza Gueorguieva is a Senior Research Scientist at the Department of Biostatistics Yale School of Public Health She has more than 20 years experience in statistical methodology development and collaborations with psychiatrists and other researchers and is the author of over 130 peer reviewed publications **An SPSS Guide for Tourism, Hospitality and Events Researchers** Rahul Pratap Singh Kaurav,Dogan Gursoy,Nimit Chowdhary,2020-12-14 This is the first book to provide the student of tourism hospitality and events with all that they need to undertake statistical analysis using SPSS for research in their industry Employing examples directly from the tourism hospitality and events sector it provides a comprehensive explanation on how appropriate statistical tools and methods can be identified for this research

context and provides a step by step demonstration on how to carry out the chosen statistical operations Each chapter opens with a sector specific case study reflecting current research trends and issues from a range of different countries that are affecting the industry today It is followed by an examination of the SPSS procedures relating to the case study and various solutions are offered The implementation of clear step by step demonstrations on how to carry out statistical operations using a combination of screenshots diagrams and tables aids the reader s understanding Chapters close with thorough guidance on how to appropriately write up interpretations of the research in a report Research implications and recommendations for tourism and hospitality businesses are also provided to enable them to successfully create and manage research strategies in action Adopting an interdisciplinary perspective and written by a range of industry experts from all over the globe this book will be essential for all students and researchers in the field of tourism hospitality and events as well as all those in related fields with an interest in statistical data analysis

**Applied Multivariate Research** Lawrence S. Meyers, Glenn Gamst, A.J. Guarino, 2016-10-28 Using a conceptual non mathematical approach the updated Third Edition provides full coverage of the wide range of multivariate topics that graduate students across the social and behavioral sciences encounter Authors Lawrence S Meyers Glenn Gamst and A J Guarino integrate innovative multicultural topics in examples throughout the book which include both conceptual and practical coverage of statistical techniques of data screening multiple regression multilevel modeling exploratory factor analysis discriminant analysis structural equation modeling structural equation modeling invariance survival analysis multidimensional scaling and cluster analysis

*Illustrating Statistical Procedures: Finding Meaning in Quantitative Data* Ray W. Cooksey, 2020-05-14 This book occupies a unique position in the field of statistical analysis in the behavioural and social sciences in that it targets learners who would benefit from learning more conceptually and less computationally about statistical procedures and the software packages that can be used to implement them This book provides a comprehensive overview of this important research skill domain with an emphasis on visual support for learning and better understanding The primary focus is on fundamental concepts procedures and interpretations of statistical analyses within a single broad illustrative research context The book covers a wide range of descriptive correlational and inferential statistical procedures as well as more advanced procedures not typically covered in introductory and intermediate statistical texts It is an ideal reference for postgraduate students as well as for researchers seeking to broaden their conceptual exposure to what is possible in statistical analysis

**Behavioral Data Analysis with R and Python** Florent Buisson, 2021-06-15 Harness the full power of the behavioral data in your company by learning tools specifically designed for behavioral data analysis Common data science algorithms and predictive analytics tools treat customer behavioral data such as clicks on a website or purchases in a supermarket the same as any other data Instead this practical guide introduces powerful methods specifically tailored for behavioral data analysis Advanced experimental design helps you get the most out of your A B tests while causal diagrams allow you to tease out the causes of behaviors even when you can t

run experiments Written in an accessible style for data scientists business analysts and behavioral scientists this practical book provides complete examples and exercises in R and Python to help you gain more insight from your data immediately Understand the specifics of behavioral data Explore the differences between measurement and prediction Learn how to clean and prepare behavioral data Design and analyze experiments to drive optimal business decisions Use behavioral data to understand and measure cause and effect Segment customers in a transparent and insightful way *Bayesian Statistics for the Social Sciences* David Kaplan, 2014-07-23 Bridging the gap between traditional classical statistics and a Bayesian approach David Kaplan provides readers with the concepts and practical skills they need to apply Bayesian methodologies to their data analysis problems Part I addresses the elements of Bayesian inference including exchangeability likelihood prior posterior distributions and the Bayesian central limit theorem Part II covers Bayesian hypothesis testing model building and linear regression analysis carefully explaining the differences between the Bayesian and frequentist approaches Part III extends Bayesian statistics to multilevel modeling and modeling for continuous and categorical latent variables Kaplan closes with a discussion of philosophical issues and argues for an evidence based framework for the practice of Bayesian statistics User Friendly Features Includes worked through substantive examples using large scale educational and social science databases such as PISA Program for International Student Assessment and the LSAY Longitudinal Study of American Youth Utilizes open source R software programs available on CRAN such as MCMCpack and rjags readers do not have to master the R language and can easily adapt the example programs to fit individual needs Shows readers how to carefully warrant priors on the basis of empirical data Companion website features data and code for the book's examples plus other resources

Regression Analysis and Linear Models Richard B. Darlington, Andrew F. Hayes, 2016-08-22 Emphasizing conceptual understanding over mathematics this user friendly text introduces linear regression analysis to students and researchers across the social behavioral consumer and health sciences Coverage includes model construction and estimation quantification and measurement of multivariate and partial associations statistical control group comparisons moderation analysis mediation and path analysis and regression diagnostics among other important topics Engaging worked through examples demonstrate each technique accompanied by helpful advice and cautions The use of SPSS SAS and STATA is emphasized with an appendix on regression analysis using R The companion website [www.afhayes.com](http://www.afhayes.com) provides datasets for the book's examples as well as the RLM macro for SPSS and SAS Pedagogical Features Chapters include SPSS SAS or STATA code pertinent to the analyses described with each distinctively formatted for easy identification An appendix documents the RLM macro which facilitates computations for estimating and probing interactions dominance analysis heteroscedasticity consistent standard errors and linear spline regression among other analyses Students are guided to practice what they learn in each chapter using datasets provided online Addresses topics not usually covered such as ways to measure a variable's importance coding systems for representing categorical variables causation and myths about testing interaction
