**Building Regulations applying to electrical and gas installation and repairs in dwellings** Great Britain: Parliament: House of Commons: Communities and Local Government Committee, 2012-03-30 Labelling on electrical equipment sold by DIY stores must be used to warn that it is illegal for an unregistered person to carry out most electrical works in the home In addition public awareness about the risk of the odourless invisible and potentially lethal carbon monoxide fumes must be raised to increase safety in the home When it comes to gas and electrical safety the Committee concludes that far too many homeowners do not appreciate either the dangers of using sub standard engineers or their own

liability when it comes to faulty gas and electrical work The Government must co ordinate a concerted effort by key industry organisations to raise public awareness levels on these crucial issues To that end the Committee recommends that sockets and other electrical equipment sold by DIY stores for electrical installations should carry a health warning that it is illegal for an unregistered person to carry out most electrical works in the home without checks being completed meeting the requirements of the Building Control service The Committee will be writing to all the big electrical DIY stores to highlight this key recommendation In its current consultation exercise into Building Regulations the Government has examined further deregulation of Part P which focuses on electrical installation and repair The Committee highlights how evidence gathered since the introduction of these rules demonstrated that deaths and injuries due to electrical faults have decreased De regulation can only be supported if there was clear evidence that safety standards would not suffer but such evidence has not been provided by the Government
