EBOOK: Principles and Practices of Marketing 10/e JOBBER AND ELLI, 2023-02-21

EBOOK Principles and Practices of Marketing 10/e **TEFL Tourism** Hayley Stainton, 2019-07-22

There is evident lineage between the concepts of teaching English as a foreign language (TEFL) and tourism represented through evocative marketing material: the commoditisation of the TEFL product, teacher motivations and experiences. Yet to date there has been no recognition of these links within industry or academia. This book introduces the concept of TEFL tourism, outlining the scale of the sector and the rapid commercialization of TEFL teaching across the world, locating it as an emerging form of niche tourism. The text outlines the organisation types and geographical locations, emphasizing the commodification of English language teaching. It also outlines the types of TEFL tourists, the complexities of international education links with various tourism forms and sustainability considerations of the industry. The book will appeal to tourism academics and students, in particular those with interests in educational and volunteer tourism as well as sustainable tourism and commodification.

The Methuen Drama Handbook of Women in Contemporary British Theatre Marissia Fragkou, Rebecca Benzie, 2025-02-06

This handbook provides a detailed exploration of the rich and diverse theatrical work produced by women in the first two decades of the 21st century British theatre. The book explores key issues and methodologies relevant to women working in the UK's theatre industry, including the legacies of feminism and its role in shaping contemporary work by women, the politics of visibility and inclusion in theatrical institutions, and collaborative strategies in creating original work. It closely examines how women in contemporary British theatre tackle urgent social issues such as environmental risk, the representation of marginalized identities, and mental and physical wellbeing. Chapters by both established and early career scholars from a variety of international contexts present new perspectives on significant questions and issues underpinning women's work in the 21st

century British theatre by engaging with contemporary debates from theatre and performance studies and cultural theory A concluding roundtable with women theatre practitioners addresses key questions pertaining to their work including working conditions the politics of funding and of ageing disability and care With a foreword by the Guardian's chief theatre critic Arifa Akbar and featuring research tools such as introductions to sections a detailed list of sources and an annotated bibliography this is an authoritative study for anyone with a keen research interest in the distinct contribution of women to contemporary British theatre and performance

Secure Edge Computing Mohiuddin Ahmed, Paul Haskell-Dowland, 2021-08-13 The internet is making our daily life as

digital as possible and this new era is called the Internet of Everything IoE Edge computing is an emerging data analytics concept that addresses the challenges associated with IoE More specifically edge computing facilitates data analysis at the edge of the network instead of interacting with cloud based servers Therefore more and more devices need to be added in remote locations without any substantial monitoring strategy This increased connectivity and the devices used for edge computing will create more room for cyber criminals to exploit the system s vulnerabilities Ensuring cyber security at the edge should not be an afterthought or a huge challenge The devices used for edge computing are not designed with traditional IT hardware protocols There are diverse use cases in the context of edge computing and Internet of Things IoT in remote locations However the cyber security configuration and software updates are often overlooked when they are most needed to fight cyber crime and ensure data privacy Therefore the threat landscape in the context of edge computing becomes wider and far more challenging There is a clear need for collaborative work throughout the entire value chain of the network In this context this book addresses the cyber security challenges associated with edge computing which provides a bigger picture of the concepts techniques applications and open research directions in this area In addition the book serves as a single source of reference for acquiring the knowledge on the technology process and people involved in next generation computing and security It will be a valuable aid for researchers higher level students and professionals working in the area
