ABSTRACT There is little extant empirical research that classifies audit committee members based on expertise and independence simultaneously. Additionally, there is little empirical research where different types of gray audit committee members are considered separately. We find disclosure quality (as perceived by financial analysts) is positively related to the percentage of audit committee members who are affiliated with companies providing services to the firm and who are financial experts and negatively related to the percentage of audit committee members who are related to firm executives and who are financial experts. We also find that adding independent audit committee financial experts predates improvements in disclosure quality. As regulators around the world consider implementing audit committee requirements mandated in the United States, our results call into question disqualifying all gray directors from audit committees.

INTRODUCTION

Accounting scandals at companies such as Cendant and Sunbeam led to increased scrutiny of corporate audit committees in the United States. This increased scrutiny arose at least partially because in the words of then chairman of the Securities and Exchange Commission

(SEC) Arthur Levitt, '... qualified, committed, independent, and tough-minded audit committees represent the most reliable guardians of the public interest'.¹ In February 1999, the Blue Ribbon Committee (BRC) on Improving the Effectiveness of Corporate Audit Committees issued its report detailing 10 recommendations for improving corporate audit committees. Among other changes, the BRC recommended that all audit committee members be independent of the firm and that at least one member possesses accounting or financial management expertise. Although the NYSE and Nasdaq adopted these recommendations, accounting scandals at firms

Corporate Governance Zabihollah Rezaee, 2025-03-31 Corporate governance has become increasingly central to corporate reporting and management as businesses face growing pressure to address their responsibilities in sustainability and corporate accountability. The evolving focus on effective corporate governance has driven the introduction of new laws, regulations, standards, and best practices, reshaping its framework, principles, and functions. Business leaders and students must stay informed about these significant reforms and the associated accountabilities. This book offers a clear, accessible guide to the key regulations, laws, and best practices essential for robust governance and stakeholder protection. It covers the roles and responsibilities of all key players in corporate governance, including directors, management, auditors, accountants, legal counsel, and financial advisors. Taking a practical approach, the book explores topics such as financial markets, investor confidence, oversight, managerial compliance, internal and external auditing, legal advisory functions, and performance reporting. It serves as a valuable resource for students and professionals seeking a comprehensive understanding of corporate governance responsibilities. Designed for both undergraduate and graduate levels, this book equips students with the knowledge and skills needed to become successful business leaders. It is an ideal reference for business colleges, accounting schools, and other corporate governance programs, with individual chapters adaptable for various accounting and business courses.

The Director and The Manager David S. Fushtey, 2019-02-01 Machiavelli Had it Easy is an engaging text for the emerging discipline of governance. Gaps arise when directors and managers come together from diverse vocational and cultural languages and interests. Compressed information streams in the digital age yet few reconcile silos of business, legal, expertise, and regulatory public interests for informed decisions. This text presents research and a market-tested decision framework for comparative law, market practice, and human nature in the vital strategic oversight role of governance. Informed by cognitive science, business practice, and legal duties, one conclusion is that bias and self-interests are instinctive, but reconciling best interests is not. Too often, lessons learned from centuries of law are overlooked. The chapters are a dozen inquiries into recurring problems in the boardroom. Part one is an entry-level technical reference of law and governance principles. Unique appendices of keywords and case notes will aid those new to markets governed by the western rule of law and those tripping on gaps in comparative jargon. Part two is a series of practical hot topics in the context of law and governance. Part three looks to next steps in accountability and liability. The text will help accountants, engineers, lawyers, and business operations and market policy experts from around the world work together, and professors, professionals, and students anticipate change. After drilling through accountability and liability for hybrid organizations, typical crises are revealed to be from a lack of aligning interests and related information churn. Conclusions of the how and why of governance systems link the human condition and the rule of law in the digital age.
