What We Think About When We Try Not To Think About Global Warming Toward A New Psychology Of Climate Action

Per Espen Stoknes

What We Think About When We Try Not To Think About Global Warming Toward A New Psychology Of Climate Action:

What We Think About When We Try Not To Think About Global Warming Per Espen Stoknes, 2015-04-03 Why does knowing more mean believing and doing less? A prescription for change. The more facts that pile up about global warming, the greater the resistance to them grows, making it harder to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead. It is a catch 22 that starts says psychologist and economist Per Espen Stoknes from an inadequate understanding of the way most humans think, act and live in the world around them. With dozens of examples from the private sector to government agencies, Stoknes shows how to retell the story of climate change and at the same time create positive, meaningful actions that can be supported even by deniers. In *What We Think About When We Try Not To Think About Global Warming*, Stoknes not only masterfully identifies the five main psychological barriers to climate action but addresses them with five strategies for how to talk about global warming in a way that creates action and solutions, not further inaction and despair. These strategies work with rather than against human nature. They are social, positive and simple, making climate friendly behaviors easy and convenient. They are also story based to help add meaning and create community and include the use of signals or indicators to gauge feedback and be constantly responsive. Whether you are working on the front lines of the climate issue, immersed in the science, trying to make policy or educate the public, or just an average person trying to make sense of the cognitive dissonance or grapple with frustration over this looming issue, *What We Think About When We Try Not To Think About Global Warming* moves beyond the psychological barriers that block progress and opens new doorways to social and personal transformation.

Das Klimafolgen-Buch

Thomas Hax-Schoppenhorst, 2024-11-11 Die globale von Menschenhand bewirkte Klima und Biodiversitätskrise hat trotz eindringlicher Mahnungen vor bereits 50 Jahren ein bedrohliches Ausmaß erreicht. Die Erderwärmung verursacht schon heute weit verbreitete Strukturen in der Natur und richtet verheerende Schäden in Meeres, Land und Süßwasser-Ökosystemen an. Es gibt keinen Ort auf der Erde, der nicht von Klimagefahren wie Hitzewellen, Dürren, Überschwemmungen und dem Anstieg des Meeresspiegels bedroht ist. Der Verlust der Artenvielfalt und der Klimawandel sind eng miteinander verknüpft. Schwerwiegende Auswirkungen auf die Gesundheit der Menschen weltweit sind die Folgen. Dem kann und muss jedoch entgegengewirkt werden. Für die zwingend erforderliche gelingende Wende liegt eine Fülle von Konzepten vor. Gelingt es auf politischer, wirtschaftlicher, sozialer und privater Ebene national wie international entschlossen zu entscheiden und vor allem zu handeln, kann unsere Erde auch in Zukunft ein lebenswerter Ort für alle bleiben. Dieses interdisziplinär angelegte Mutmachende Buch bietet wissenschaftlich basierte Analyse und eine Fülle von Ansätzen zum Umgang mit der globalen Krise des Klimas und dem Schwund der Artenvielfalt. Es ermutigt Lesende angstfrei motiviert und gestaltend Artenvielfalt zu mehren und Klimafolgen abzumildern. Herausgeber und AutorInnen bieten fundierte Informationen und zu den Themen Klimawandel

[Crisis and the Culture of Fear and Anxiety in Contemporary Europe](#) Carmen Zamorano Llena,Jonas Stier,Billy Gray,2023-08-01 The accrualment of crises over the last two decades with their particular manifestations in the European context has evoked the feeling of living in exceptional times as captured in the recurrent claim that we live in the age of anxiety The main aim of this collection is to analyse from a multidisciplinary perspective the causes and consequences of the current dominance of the discourse of fear anxiety and crisis through the experience of distinct and often interdependent moral panics in twenty first century Europe With its multidisciplinary approach this volume sheds light on the need to view the interrelationship between different crises and their associated affects as crucial in attaining a more nuanced understanding of the aetiology and effects of the current age of anxiety This multidisciplinary scrutiny of the interrelationship of twenty first century fears anxiety and crises signals an original engagement with these complex phenomena in order to make their emergence and profound effects on contemporary society more comprehensible The timeliness of the thematic focus and the rigorous in depth analyses make this collection relevant to students and academics within the fields of sociology literary and cultural studies political science and anthropology as well as to those in European studies and global studies

Eco-anxiety and Pandemic Distress Douglas A. Vakoch, Sam Mickey, 2023 Through much of 2020 and into 2021 nations throughout the world locked down because of the COVID 19 pandemic Before then the most pressing global anxiety for many people was climate anxiety However these phenomena are in many ways interconnected Many of the elements in the global economic and logistical systems cause both ecological problems and vulnerability to pandemics When pandemics happen they influence ecological problems for better or worse In turn ecological dynamics shape pandemics

Liberalism and the Challenge of Climate Change Christopher Shaw, 2023-08-25 In this book Christopher Shaw analyses how liberalism has shaped our understanding of climate change and how liberalism is legitimated in the face of a crisis for which liberalism has no answers

The language and symbolism we use to make sense of climate change arose in the post World War II liberal institutions of the West This language and symbolism in neutralising the philosophical and ideological challenge climate change poses to the legitimacy of free market liberalism has also closed off the possibility of imagining a different kind of future for humanity The book is structured around a repurposing of the guardrail concept commonly used in climate science narratives to communicate the boundary between safe and dangerous climate change Five discursive guardrails are identified which define a boundary between safe and dangerous ideas about how to respond to climate change The theoretical treatment of these issues is complemented with data from interviews with opinion formers decision makers and campaigners exploring what models of human nature and political possibilities guide their approach to the politics of climate change governance This book will be of great interest to students and scholars of climate change liberal politics environmental communication and environmental politics and philosophy in general
