The End of Cheap Labour? Florian Butollo, 2014-11-06 Can China s economy overcome its excessive dependence on exports The Chinese government and international observers argue that this is needed if growth is to be sustained in the future But substantial growth of domestic consumption can only be achieved if China also steps beyond its reliance on cheap migrant labour Florian Butollo approaches this issue by means of a thorough empirical investigation of the recent transformation of

industries in the Pearl River Delta China's largest industrial hub He uncovers that industrial upgrading rarely supports improvements in the basic employment pattern in enterprises in the garment and LED lighting industry This failure of social upgrading threatens to undermine the project of a rebalancing of the Chinese economy The book shows that the implementation of collective labour rights remains an important precondition for the future of the Chinese growth model
