Medical Treatment of Children and the Law Jo Bridgeman, 2020-11-19 The high profile cases of Charlie Gard Alfie Evans and Tafida Raqeeb raised the questions as to why the state intrudes into the exercise of parental responsibility concerning the medical treatment of children and why parents may not be permitted to decide what is in the best interests of their child This book answers these questions It argues for a reframing of the law concerned with the medical treatment of children to one which better protects the welfare of the individual child within the context of family relationships recognising the duties which professionals have to care for the child and that the welfare of children is a matter of public interest protected through the intervention of the state This book undertakes a rigorous critical analysis of the case law concerned with the provision of medical treatment to children since the first reported cases over forty years ago It argues that understanding of the cases only as disputes over the best interests of the child and judicial resolution thereof fails to recognise professional duties and public responsibilities for the welfare and protection of children that exist alongside parental responsibilities and which justify public or state intervention into family life and parental decision making Whilst the principles and approach of the court established in the early cases endure the nature and balance of these responsibilities to children in their care need to be understood in the changing social legal and political context in which they are exercised and enforced by the court The book will be a valuable resource for academics students and practitioners of Medical Law Healthcare Law Family Law Social Work Medicine Nursing and Bioethics

Regulating Decision-Making in Multiple Pregnancy Jeffrey Wale, 2021-06-22. This book examines the regulation and practice of medical decision making where the context is that of a multiple pregnancy and where the question is whether or not to carry out a fetal reduction procedure. It concerns three main lines of inquiry: first, the nature of fetal reduction and the legal grounds for termination typically relied upon; secondly, the extent to which legal, ethical, and professional norms guide or constrain this particular kind of decision making; and thirdly, the adequacy of these norms. The book uses empirical sources to develop its analysis, contributing new insight and the kind of evidence necessary to shape regulation, clinical practice, and future research. The key findings show that fetal abnormality is often given as the justifying ground that the legal, ethical, and professional norms offer little explicit guidance for fetal reduction, and on the general question of termination, ethical norms suffer from a high level of contestation. The key norms in the UK abortion legislation are unclear and disconnected from practice, and professional norms are only marginally more adequate. Given the indeterminacy of these norms, it is no surprise that the evidence indicates that doctors are only weakly guided by them in making their decisions. Various recommendations are advanced in this book, including the need for a situational emphasis on shared decision making and patient-centred care.

What is The Family of Law? Alan Brown, 2019-02-07. This book argues that the legal understanding of family in the UK continues to be underpinned by the idealised image of the nuclear family premised upon the traditional gendered roles of father as breadwinner and mother as homemaker. This examination of the law's model of the family has been prompted by the substantial reforms that have taken place in family law in recent decades and the significant evolution in social attitudes and familial practices that has occurred in parallel. Throughout the book, the influence of the nuclear family is noted in several different contexts: various specific legal definitions of family, the legal regulation of adult conjugal relationships, the attribution of legal parenthood, and the construction of the role of the parent within the law. Ultimately, this book argues that while these reforms have resulted in additional categories of relationship coming to be situated within the nuclear family model, there has not as yet been any fundamental alteration of the underpinning concept of the nuclear family itself. This book concludes by considering the possibilities offered beyond the nuclear family, exploring the reconceptualising of the legal understanding of family around alternative and potentially radical models of family.

Medical Ethics Eldo Frezza, 2018-10-25. Medical ethics is a system of moral principles that apply values to the practice of clinical medicine and in scientific research. Medical ethics allow for people regardless of background to be guaranteed quality and principled care. It is based on a set of values that professionals can refer to in the case of any confusion or conflict. These values include the respect for autonomy, non-maleficence, beneficence, and justice. These tenets allow doctors, care providers, and families to create a treatment plan and work towards the same common goal without any conflict. Succeeding in the healthcare field means more than just making a diagnosis and writing a prescription. Healthcare professionals are responsible for convincing patients and their family members of the best course of action and treatments to follow while knowing how to make the right moral and ethical choices. Ethical teaching should be an active part of training and should be taught in four divisions: basic ethics, clinical ethics, legal principles related to ethics, and the ethics of research and affiliation. This book is a reference guide for physicians, healthcare providers, and administrative staff. It looks at the ethical problems they face every day, gives the background and the ethical problem, and then provides practical advice which can be easily implemented. This book provides the knowledge needed to understand who has the right to healthcare, the justice of clinical practice, what autonomy means for a patient giving consent, who is going to make any surrogate decisions, and more.

In doing so, it offers an excellent overview of the current bioethical issues in medical law in light of recent and ongoing technological developments in medicine. This collection of essays by one of the world's leading medical lawyers is academic research of the highest quality. With an enviable clarity of thought and force of argument, Professor Smith tackles some of the major issues facing medicine and law today. It is a tour de force by an academic at the height of his powers. Professor Jonathan Herring, University of Oxford.

Subjectivity, Citizenship and Belonging in Law Anne Griffiths, Sanna Mustasaari, Anna Mäki-Petäjä-Leinonen, 2016-10-04. This collection of articles critically examines legal subjectivity and ideas of citizenship inherent in legal thought. The chapters offer a novel perspective on current debates in this area by exploring the connections between public and political issues as they intersect with more intimate sets of relations and private identities. Covering issues as diverse as autonomy, vulnerability and care, family and work, immigration control, the institution of speech and the electorate, and the right to vote, they provide a broader canvas upon which to comprehend more complex notions of citizenship, personhood, identity and belonging in law in their various ramifications.
