Metaphor And Metonymy Revisited Beyond The Contemporary Theory Of Metaphor Recent Developments And Applications Benjamins Current Topics:

Metaphor and Metonymy revisited beyond the Contemporary Theory of Metaphor Francisco González-García, María Sandra Peña Cervel, Lorena Pérez Hernández, 2013-10-30 The contributions in this volume go beyond the Contemporary Theory of Metaphor complementing it in a number of relevant ways Some of the papers argue for a more dynamic interdisciplinary approach to metaphor looking into it from semiotic psychological and socio cultural perspectives Other contributions focus on the crucial role played by metaphor and metonymy in meaning construction at a discourse textual level Finally the volume also includes proposals which revolve around the alleged universal nature of metaphorical mappings and their suitability to account for grammatical phenomena The contributions in this volume display an ample gamut of theoretical approaches pointing to the viability of taking a functional cognitive stance on the analysis of metaphor and metonymy in contrast to a purely cognitive one This book is structured into three major sections i the Contemporary Theory of Metaphor revisions and recent developments ii metaphor and or metonymy across different discourse genre types and iii the Contemporary Theory of Metaphor current applications Originally published in Review of Cognitive Linguistics 9 1 2011

Determined by Christ: The Pauline Metaphor 'Being in Christ' Barbara Beyer, 2024-01-22 What does it mean that the believers are in Christ Rom 8 1 2 Cor 5 17 etc The phrase has become so common to Christian discourse that it obscures the original meaning By analysing key passages and stripping back the interpretive layers this book portrays in Christ in the light of Greek language usage Insights from metaphor theory onomastics and ritual theory further the investigation The book also addresses prepositional phrases like with Christ and how in Christ developed in the deutero Pauline letters This comprehensive perspective illuminates a crucial early Christian phrase and how believers viewed their relationship to Christ

Metaphors and Analogies in Sciences and Humanities Shyam Wuppuluri, A. C. Grayling, 2022-05-30 In this highly interdisciplinary volume we systematically study the role of metaphors and analogies in mis shaping our understanding of the world Metaphors and Analogies occupy a prominent place in scientific discourses as they do in literature humanities and at the very level of our thinking itself But when misused they can lead us astray blinding our understanding inexorably How can metaphors aid us in our understanding of the world What role do they play in our scientific discourses and in humanities How do they help us understand and skillfully deal with our complex socio political scenarios Where is the dividing line between their use and abuse Join us as we explore some of these questions in this volume

Current Approaches to Metaphor Analysis in Discourse Ignasi Navarro i Ferrando, 2019-09-02 This volume takes up the challenge of surveying the present state of a variety of approaches to the identification analysis and interpretation of metaphor across communication channels situational contexts genres and social spheres It reflects three foremost trends of present metaphor research namely the communicative approach the cognitive modelling approach and the multimodality approach These trends are considered as

areas of research emerging on the ground of the Conceptual Metaphor Theory initiated by Lakoff The book intends to show their concomitances as well as mark their diversifying paths The aim is to bring about and make apparent the many connections among assumingly different trends stemming from CMT Whereas discrepancies between communicative and conceptual perspectives might seem irredeemable the book emphasizes and claims that the background framework of CMT provides a solid foundation for collaboration and mutual influence Consequently the analysis of metaphor usage in context may provide insights for cognitive modelling proposals The analysis of cognitive configuration of conceptual domains may in turn illuminate our understanding of communicative decisions in discourse The integration of multimodal metaphor analysis puts forward the idea that diverse modal manifestations of metaphor reveal the symbiosis between communicative and cognitive stances The various subject areas and methodologies illuminate the scene of current research in the field The poignant contributions open far reaching avenues into the realm of human thought and discourse Metaphor and Corpus

Linguistics Alice Deignan,2005-06-09 Metaphor is a topical issue across a number of disciplines wherever researchers are concerned with how speakers and writers package and process messages This book is addressed at readers from diverse academic backgrounds who are interested in ways of researching metaphor from different perspectives and especially through corpus linguistics A number of approaches to and exploitations of metaphor including conceptual metaphor theory and cognitive approaches more generally text and spoken discourse analysis and CDA are discussed explored and critiqued using corpus data The book also includes corpus linguistic studies of different aspects of metaphor which investigate its linguistic and semantic properties and relate them to current theoretical views The book demonstrates the need for naturally occurring language data to be used in the development of metaphor theory and shows the value of corpus data and techniques in this work Metaphor, Metonymy, and Experientialist Philosophy Verena Haser,2005 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics **Metaphor and Metonymy in the**

Digital Age Marianna Bolognesi,Mario Brdar,Kristina Despot,2019-08-06 This book describes methods risks and challenges involved in the construction of metaphor and metonymy digital repositories The first part of this volume showcases established and new projects around the world in which metaphors and metonymies are harvested and classified The second part provides a series of cognitive linguistic studies focused on highlighting and discussing theoretical and methodological risks and challenges involved in building these digital resources The volume is a result of an interdisciplinary collaboration between cognitive linguists psychologists and computational scientists supporting an overarching idea that metaphor and metonymy play a central role in human cognition and that they are deeply entrenched in recurring patterns of bodily

experience Throughout the volume a variety of methods are proposed to collect and analyze both conceptual metaphors and metonymies and their linguistic and visual expressions

Metaphor and Metonymy in Comparison and Contrast René Dirven, Ralf Pörings, 2002 The book elaborates one of Roman Jakobson's many brilliant ideas i.e. his insight that the two cognitive strategies of the metaphoric and the metonymic are the end points on a continuum of conceptualization processes This elaboration is achieved on the background of Lakoff and Johnson's twodomain approach i.e. the mapping of a source onto a target domain of conceptualization Further approaches dwell on different stretches of this metaphor metonymy continuum Still other papers probe into the specialized conceptual division of labor associated with both modes of thought Two new breakthroughs in the cognitive linguistics approach to metaphor and metonymy have recently been developed one is the three domain approach which concentrates on the new blends that become possible after the integration or the blending of source and target domain elements the other is the approach in terms of primary scenes and subscenes which often determine the way source and target domains interact

Finding Metaphor in Grammar and Usage Gerard Steen, 2007 Cognitive linguists have proposed that metaphor is not just a matter of language but of thought and that metaphorical thought displays a high degree of conventionalization In order to produce converging evidence for this theory of metaphor a wide range of data is currently being studied with a large array of methods and techniques Finding Metaphor in Grammar and Usage aims to map the field of this development in theory and research from a methodological perspective It raises the question when exactly evidence for metaphor in language and thought can be said to count as converging It also goes into the various stages of producing such evidence conceptualization operationalization data collection and analysis and interpretation The book offers systematic discussion of eight distinct areas of metaphor research that emerge as a result of approaching metaphor as part of grammar or usage language or thought and symbolic structure or cognitive process

Drawing Attention to Metaphor Camilla Di Biase-Dyson, Markus Egg, 2020-04-15 The communicative act of drawing attention to metaphor is a relatively recent topic in metaphor studies and one that has remained contentious from a cognitive perspective This book brings philologists of ancient languages together with metaphor experts from several modalities to interrogate whether ancient and modern texts and languages draw attention to figurative tropes in similar ways In this way the diachronic multimodal and pluridisciplinary contributions to this volume critically review the theoretical frameworks underpinning metaphor marking and metaphor analysis from a completely new empirical basis

Attention to Metaphor Valentina Cuccio, 2018-09-25 The last decades of the twentieth century have witnessed a fundamental scientific discovery the identification of mirror neurons and consequently the development of the Embodied Simulation theory Neuroscientific data on the mechanism of Embodied Simulation and its role in conceptual and linguistic processing figurative language included have stimulated a great deal of research on the embodied nature of conceptual metaphors However the very definition of the notions of body and embodiment are today still controversial in the Embodied Cognition debate This book addresses the issue

of the specific contribution of the body to conceptual and linguistic processing and provides a new definition for the mechanism of Embodied Simulation In this light and in consideration of a revision of the contemporary theory of metaphor recently introduced by Gerard Steen who distinguished between deliberate and non deliberate metaphor processing the book also proposes a new model of metaphor processing that brings together the mechanism of Embodied Simulation on the one hand and the notion of deliberateness on the other Modulation of attention during linguistic processing is a key component in explaining how they interact Potential readers of the book include linguists psychologists philosophers and any other cognitive scientists and communication scientists piqued by the topic of metaphor and embodiment

Visual Metaphors Réka Benczes, Veronika Széldi, 2022-09-15 Whenever we think about the world including its concrete and abstract entities we typically see a series of so called mental images in front of our eyes that aid us in everyday problem solving and navigating ourselves in the world Visual metaphors similarly to their linguistic counterparts largely build on such images Nevertheless the interplay of metaphorical metonymical text and imagery is not necessarily and not usually straightforward and raises complex theoretical and methodological questions The eleven chapters in this collection address a wide range of such challenges such as what are visual metaphors in the first place how can they be identified what is their relationship to linguistic metaphors what are their most common manifestations what knowledge structures are required for their interpretation and how do they interact with metonymies The studies cut across linguistics politics philosophy poetry art and history highlighting the ubiquitous role that visual metaphor plays in everyday life and conceptualizations Originally published as special issue of *Cognitive Linguistic Studies* 7 1 2020

Metaphor and Metonymy across Time and Cultures Javier E. Díaz-Vera, 2014-12-11 This volume offers new insights into figurative language and its pervasive role as a factor of linguistic change The case studies included in this book explore some of the different ways new metaphoric and metonymic expressions emerge and spread among speech communities and how these changes can be related to the need to encode ongoing social and cultural processes in the language They cover a wide series of languages and historical stages

Metaphor and Metonymy at the Crossroads Antonio Barcelona, 2000 The future of English linguistics as envisaged by the editors of *Topics in English Linguistics* lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics

Corpus-based Approaches to Metaphor and Metonymy Anatol Stefanowitsch, Stefan Thomas Gries, 2007 The papers in this volume deal with the issue of how corpus data relate to the questions that cognitive linguists have typically investigated with respect to conceptual mappings The authors in this volume investigate a wide range of issues the coherence and function of particular metaphorical models the interaction of form and meaning the identification of source domains of metaphorical expressions the relationship between metaphor

and discourse the priming of metaphors and the historical development of metaphors The studies deal with a variety of metaphorical and metonymic source and target domains including the source domains SPACE ANIMALS BODY PARTS ORGANIZATIONS and WAR and the target domains VERBAL ACTIVITY ECONOMY EMOTIONS and POLITICS In their studies the authors present a variety of corpus linguistic methods for the investigation of conceptual mappings for example corpora annotated for semantic categories concordances of individual source domain items and patterns and concordances of target domain items In sum the papers in this volume show how a wide range of corpus linguistic methods can be used to investigate a variety of issues in cognitive linguistics the combination of corpus methods with a cognitive linguistic view of metaphor and metonymy yields new answers to old questions and to new questions about the relationship between language as a conceptual phenomenon and language as a textual phenomenon

The Ubiquity of Metaphor Wolf Paprotté, René Dirven, 1985-01-01 This volume brings together a number of articles representative of the present outlook on the importance of metaphors and of the work done on metaphors in several domains of psycho linguistics The first part of the volume deals with metaphor and the system of language The second part offers papers on metaphor and language use In the third part psychological and psycholinguistic aspects of metaphor are discussed

Dynamism in Metaphor and Beyond Herbert L. Colston, Teenie Matlock, Gerard J. Steen, 2022-09-15 The last half century witnessed an upheaval in scientific investigation of human meaning making and meaning sharing Dynamism in Metaphor and Beyond is offered as a snapshot of the status of this multidisciplinary endeavor a peak under the umbrella of what Cognitive Linguistics Psycholinguistics Figurative Language Studies and related fields have morphed into This volume honors Raymond W Gibbs who played no small role in this upheaval The themes and insights emerging from the chapters i e among others a need for account integration a new appreciation of the dynamic nature of figurative and all meaning making a need for continued broadening of the communicative techniques in our studied topics greater attention to emotion a deepened appreciation of social motivations and psychological processes involved etc may guide us in our continued grappling with meaning making and meaning sharing via metaphor through figurative language and via other communicative phenomena associated with them

Researching and Applying Metaphor in the Real World Graham Low, Zazie Todd, Alice Deignan, Lynne Cameron, 2010-10-13 It has become increasingly clear that metaphor needs to be explored in terms of the social and discourse context in which it is used especially where the aim is to address real world problems The notion of real world metaphor research has been developed to describe this important area of investigation This book starts by describing the nature and scope of real world metaphor research and then illustrates through 17 detailed mainly empirically based studies the different areas it can apply to and different methodologies that can be employed Research problems are explored in areas such as artificial intelligence language teaching and learning reconciliation dialogue university lecture discourse poetry and wine description Methods include corpus analysis experimentation discourse analysis cross cultural analysis and genre

analysis In each case the empirical studies refer back to Gibbs s opening overview of real world research The result is an invaluable and cross referenced collection of papers addressing real world problems *Metaphor* ,1985-01-01 The aim of the present bibliography is to provide the student of metaphor with an up to date and comprehensive albeit not exhaustive overview of recent publications dealing with various aspects of metaphor in a variety of disciplines Where the emphasis is primarily on specific works about metaphor mainly in philosophy linguistics and psychology the list has been supplemented with references to studies where metaphor is explicitly recognized as an instrument of research or analysis e g in literature or in the elaboration of scientific and religious models or where its use is illustrated **Cognitive Explorations Into Metaphor and Metonymy** Frank Polzenhagen,Zoltán Kövecses,Stefanie Vogelbacher,Sonja Kleinke,2014 This volume presents cognitive linguistic studies on metaphor and metonymy It includes papers with a theoretical scope and case studies The topics range from emotion terms political and scientific discourse morphology cross cultural variation to internet communication The authors use corpus based qualitative and discourse analytic methods
