## **Methods For The Economic Evaluation Of Health Care Programmes:**

Methods for the Economic Evaluation of Health Care Programmes Michael F. Drummond, Mark J. Sculpher, Karl Claxton, Greg L. Stoddart, George W. Torrance, 2015 This highly successful textbook is now in its fourth edition and has been extensively updated in order to keep pace with the considerable advances in theory and practice in recent years

Methods for the Economic Evaluation of Health Care Programmes M. F. Drummond, 2005 This highly successful textbook is now available in its third edition Over the years it has become the standard textbook in the field world wide It mirrors the huge expansion of the field of economic evaluation in health care since the last edition was published in 1997 This new edition builds on the strengths of previous editions being clearly written in a style accessible to a wide readership Key methodological principles are outlined using a critical appraisal checklist that can be applied to any published study The methodological features of the basic forms of analysis are then explained in more detail with special emphasis of the latest views on productivity costs the characterisation of uncertainty and the concept of net benefit The book has been greatly revised and expanded especially concerning analysing patient level data and decision analytic modelling There is discussion of new methodological approaches including cost effectiveness acceptability curves net benefit regression probabilistic sensitivity analysis and value of information analysis There is an expanded chapter on the use of economic evaluation including discussion of the use of cost effectiveness thresholds equity considerations and the transferability of economic data This new edition is required reading for anyone commissioning undertaking or using economic evaluations in health care and will be popular with health service professionals health economists pharmacists and health care decision makers It is especially relevant for those taking pharmacoeconomics courses

**Methods for the Economic Evaluation of Health Care Programmes** M. F. Drummond, 1997 Since its publication in 1987 *Methods for the economic evaluation of health care programmes* has become the standard textbook in this field world wide Over the past ten years the field of economic evaluation in health care has expanded considerably with a rapid rise in the number of published studies and wider recognition of their use in health care decision making Developments in economic evaluation have also led to the publication of several guidelines for study methodology most recently those proposed by the United States Public Health Services Panel The new edition of *Methods for the economic evaluation of health care programmes* follows the same basic structure as the first edition The key methodological principles are outlined using a critical appraisal checklist that can be applied to any published study The methodological features of the basic forms of analysis cost analysis cost effectiveness analysis cost utility analysis and cost benefit analysis are then explained in more detail The book has been greatly revised and enlarged especially with respect to cost utility and cost benefit analysis where major methodological developments have taken place New to this edition are chapters on collecting and analysing data and presenting and using economic evaluation results The new edition will be required reading for anyone commissioning undertaking or using economic evaluations in health care and

will be popular with health service professionals health economists and health care decision makers Reviews of the first edition An important contribution to studies on the economic evaluation of medical care British Medical Journal This is essential reading Only if all managers are aware of the powers of economic techniques will they be used sensibly The Health Service Journal UK The methodological chapters on cost analysis and cost utility analysis are gems should become the standard text on the subject at the intermediate level at which it is aimed Medical Decision Making It leaves nothing important in economic evaluation analysis untouched Health Policy and Planning Methods for the Economic Evaluation of Health Care Programmes M. F. Drummond,B. O'Brien,G. L. Stoddart,1997 Methods for the Economic Evaluation of Health Care Programmes Michael F. Drummond,2015 9 2 The role of decision analytic models for economic evaluation

**Theory and Methods of Economic Evaluation of Health Care** Magnus Johannesson,2013-03-09 Most economic evaluations of health care programmes at the moment are cost effectiveness and cost utility analyses The problem with these methods is that their theoretical foundations are unclear This has led to confusion about how to define the costs and health effects and how to interpret the results of these studies In the environmental and traffic safety fields it is instead common to carry out traditional cost bene fit analyses of health improving programmes This striking difference in how health programmes are assessed in different fields was the original motivation for writing this book The aim of the book is to try and provide a coherent framework within cost bene fit analysis and welfare economics for the different methods of economic evaluation in the health care field The book is written in an easily accessible manner and several examples of applications of the different methods are provided It is my hope that it will be useful both for teaching purposes and as a guide for practitioners in the field Glenn C Blomquist John D Graham Rich O Connor and four anonymous referees provided helpful comments on previous versions of the manuscript I would also like to express my gratitude to the following persons for helping me to prepare the manuscript Carl Magnus Berglund Carin Blanksvard Ann Brown and Ziad Obeid Methods for the Economic Evaluation of Health Care Programmes Michael F. Drummond,Mark J. Sculpher,Karl Claxton,Greg L. Stoddart,George W. Torrance,2015-09-25 The purpose of economic evaluation is to inform decisions intended to improve healthcare The new edition of Methods for the Economic Evaluation of Health Care Programmes equips the reader with the necessary tools and understanding required to undertake evaluations by providing an outline of key principles and a tool kit based on the authors own experiences of undertaking economic evaluations Building on the strength of the previous edition the accessible writing style ensures the text is key reading for the non expert reader as no prior knowledge of economics is required The book employs a critical appraisal framework which is useful both to researchers conducting studies and to decision makers assessing them Practical examples are provided throughout to aid learning and understanding The book discusses the analytical and policy challenges that face health systems in seeking to allocate resources efficiently and fairly New chapters include Principles of economic evaluation and Making decisions in healthcare which introduces the reader to

core issues and questions about resource allocation and provides an understanding of the fundamental principles which guide decision making A key part of evidence based decision making is the analysis of all the relevant evidence to make informed decisions and policy The new chapter Identifying synthesising and analysing evidence highlights the importance of systematic review and how and why these methods are used As methods of analysis continue to develop the chapter on Characterising reporting and interpreting uncertainty introduces the reader to recent methods of analysis and why characterizing uncertainty matters for health care decisions The fourth edition of *Methods for the Economic Evaluation of Health Care Programmes* has been thoroughly revised and updated making it essential reading for anyone commissioning undertaking or using economic evaluations in health care including health service professionals health economists and health care decision makers

**Methods for the Economic Evaluation of Health Care Programmes**, 1997 *Handbook of Economic Evaluation of HIV Prevention Programs* David R. Holtgrave, 2013-06-29 If resources for HIV prevention efforts were truly unlimited then this book would be entirely unnecessary In a world with limitless support for HIV prevention activities one would simply implement all effective or potentially effective programs without regard to expense We would do everything useful to prevent the further spread of the virus that has already claimed hundreds of thousands of lives in the United States and millions of lives worldwide Unfortunately funding for HIV prevention programs is limited Even though the amount of available funding may seem quite large especially in the United States it is still fixed and not sufficient to meet all needs for such programs This was very well illustrated in the summer of 1997 when over 500 community based organizations applied for a combined total of 18 million of HIV prevention funding from the U S Centers for Disease Control and Prevention CDC Less than one fifth of these organizations received support via this funding mechanism Hence although 18 million may seem like a large amount of money at first blush it is not enough to meet all of the prevention needs that could be addressed by these community based organizations
