Education Institutions Vasiliki Kioupi,Rosario Michel-Villarreal,Felister Nzuve,Naoya Abe,George Giannopoulos,2025-08-07

Calls for transforming higher education toward sustainability by academics are not new. Recently students both current and prospective have actively voiced their demands for this change. They seek an education that equips them to navigate the complexities of sustainability and climate change, fostering knowledge and skills for action. In response, higher education institutions (HEIs) are formulating strategies to align their mission with sustainability goals. However, the effectiveness of these strategies, along with the underlying policies and practices, remains insufficiently studied. To address this gap, it is crucial to convene academics, professional staff, and students for discussions on necessary cultural shifts, a roadmap, and ways to monitor and evaluate this change. Such dialogues will lead to improved decision making for transformation to achieve sustainability. Students will not only learn about sustainability in their courses but also apply them to their lives within and beyond universities that champion holistic sustainability transformation.

This Is Beyond Budgeting Bjarte Bogsnes,2023-02-01 Beyond Budgeting is the idea of making organizations perform better by changing their management model including abolishing the traditional budgeting process The model s tested and proven leadership and management process recommendations makes organizations more adaptive and human and helps making agile transformations successful This book is written for decision makers within an enterprise In nontechnical language it explains what Beyond Budgeting is how it works and why it improves performance through the use of actual cases where it has been implemented It discusses what challenges will need to be overcome to make implementation succeed and provides the many benefits that can be realized once the organization has completed the implementation **Divine Teaching and the Way of the World** Samuel Fleischacker,2011-04-21 Samuel Fleischacker defends what the Enlightenment called revealed religion religions that regard a certain text or oral teaching as sacred as wholly authoritative over one s life At the same time he maintains that revealed religions stand in danger of corruption or fanaticism unless they are combined with secular scientific practices and a secular morality The first two parts of Divine Teaching and the Way of the World argue that the cognitive and moral practices of a society should prescind from religious commitments they constitute a secular way of the world to adapt a phrase from the Jewish tradition allowing human beings to work together regardless of their religious differences But the way of the world breaks down when it comes to the question of what we live for and it is this that revealed religions can illumine Fleischacker first suggests that secular conceptions of why life is worth living are often poorly grounded before going on to explore what revelation is how it can answer the question of worth better than secular worldviews do and how the revealed and way of the world elements of a religious tradition can be brought together
