Preventing Treaty Abuse
Daniel Blum,Markus Seiler,2016-09-19 Analysis of notion roots und measures of treaty abuse The OECD initiative on Base Erosion and Profit Shifting has put the issue of treaty abuse and the means to counter it on top of the global political agenda Preventing treaty abuse is therefore currently one of the most debated topics in international tax law Diverging national legal traditions in combatting abuse both under domestic and tax treaty law have led to a globally diversified legal framework in this respect and make the OECD s agenda to harmonize these attempts even more challenging The aim of this book is to analyze the notion of treaty abuse its historical roots and the measures to counter it The book s topics cover a wide range of both policy and legal issues The contributions main focus lies on analyzing the proposals put forward by the OECD in BEPS action items 6 and 7 In addition this book analyzes the lessons which can be learnt from the US tax treaty policy and elaborates on the effects the intensified fight against treaty abuse will have from a Non OECD member state perspective Also EU law is taken into account and the question raised which impact the fundamental freedoms might have on the development of new anti avoidance rules Finally the relation between domestic and treaty based anti avoidance is analyzed in great detail identifying the methodical problems of ensuring a sound and abuse safe legal framework With this book the authors and editors hope to contribute to the discussion on selected issues of preventing treaty abuse and the challenges they present to policy makers judges tax administrations and tax advisers

Non-discrimination and Trade in Services
Catherine A. Brown,2017-05-02 This book argues that the proliferation of global trade and the increasing power of free trade arrangements leave income taxes as one of the few remaining measures that can potentially be used for protectionist purposes It analyzes the interaction between the non discrimination principles in tax treaties and trade related agreements

including multilateral WTO regional NAFTA AANZTA and bilateral free trade agreements The absence of a non discrimination obligation with respect to tax measures that apply to non resident service providers and to non resident services may therefore significantly undermine trade obligations The book clearly reveals how these tax barriers to trade may unfairly or unnecessarily restrict trade in services and puts forward a new more effective non discrimination obligation in tax matters to be included in tax treaties one that would more closely parallel the non discrimination obligations in trade agreements The book examines the concept of non discrimination in tax matters from several perspectives specifically a North American and Australian perspective as well as a perspective based on EU and UK law focusing on the interaction between these legal systems bilateral tax treaties regional trade agreements and where relevant the General Agreement on Trade in Services GATS The book explores the possibility of a reciprocal influence between tax treaties and trade agreements and poses the question as to whether tax treaties might do more in providing a non discrimination principle in the cross border trade in services div

Multilateral Cooperation in Tax Law Martin Klok, Katharina Moldaschl, 2023-10-03 An in depth analysis of various aspects of multilateral cooperation in tax law Tax evasion and aggressive tax planning causing base erosion and profit shifting BEPS has been a widely discussed topic among academics and tax policy makers over the past decades Increasing globalization and digitalization have contributed to the intensification of this issue in recent years At the same time states continue to largely insist on their sovereignty in the area of tax law However due to their cross border nature issues related to BEPS are shared problems among the states and can typically not be solved by a single nation Therefore multilateral cooperation represents an option to build a bridge between the states demand for sovereignty and the problems caused by BEPS In this regard the OECD the UN and the EU play an important role in introducing international tax standards in an attempt to effectively address tax evasion and aggressive tax planning in many ways The interaction and cooperation between different international supranational EU and regional organizations is an ongoing process In this context the topic *Multilateral Cooperation in Tax Law* was selected as the general topic for the master s theses of the part time 2021/23 class of the postgraduate LL M programme in International Tax Law at WU Vienna University of Economics and Business This volume aims to develop academic insights provide practical guidance and enable an in depth analysis of various aspects of this topic The book is divided into four parts The first part deals with a general overview of the understanding of multilateral cooperation the background that led to the need for multilateral cooperation and the different stakeholders that play a relevant role in it While the chapters included in the second part focus on the most important developments on an international level OECD and UN the chapters encompassed in the third part analyse the multilateral cooperation initiatives of the EU Finally the chapters included in part four deal with selected issues related to multilateral cooperation in tax law including mutual assistance and exchange of information dispute resolution mechanisms and measures in digitalized businesses

A Global Analysis of Tax Treaty Disputes Eduardo Baistrocchi, 2017-08-17 This two volume

set offers an in depth analysis of the leading tax treaty disputes in the G20 and beyond within the first century of international tax law Including country by country and thematic analyses the study is structured around a novel global taxonomy of tax treaty disputes and includes an unprecedented dataset with over 1500 leading tax treaty cases By adopting a contextual approach the local expertise of the contributors allows for a thorough and transparent analysis This set is an important reference tool for anyone implementing or studying international tax regulations and will facilitate the work of courts tax administrations and practitioners around the world It is designed to complement model conventions such as the OECD Model Tax Convention on Income and on Capital Together with Resolving Transfer Pricing Disputes 2012 it is a comprehensive addition to current debate on the international tax law regime *Cryptoassets* Chris Brummer,2019

Cryptoassets represent one of the most high profile financial products in the world and fastest growing financial products in history From Bitcoin Ethereum and Ripple s XRP so called utility tokens used to access financial services to initial coin offerings that in 2017 rivalled venture capital in money raised for startups with an estimated 5 6 billion USD raised worldwide across 435 ICOs All the while technologists have hailed the underlying blockchain technology for these assets as potentially game changing applications for financial payments and record keeping At the same time cryptoassets have produced considerable controversy Many have turned out to be lacklustre investments for investors Others especially ICOs have also attracted noticeable fraud failing firms and alarming lapses in information sharing with investors Consequently many commentators around the world have pressed that ICO tokens be considered securities and that concomitant registration and disclosure requirements attach to their sales to the public This volume assembles an impressive group of scholars businesspersons and regulators to collectively write on cryptoassets This volume represents perspectives from across the regulatory ecosystem and includes technologists venture capitalists scholars and practitioners in securities law and central banking Justice, Equality and Tax Law Nevla Čičin-Šain,Mario Riedl,2022-10-05 An in depth analysis of the specific aspects of justice equality and tax law Justice Equality and Tax Law is a topic that is both old and new at the same time Even if the society changes the demands that tax needs to be just and equal seem to be immutable What changes of course is the perception of the content of those demands International taxation post BEPS has been fraught with new challenges that warranted urgent responses These challenges were mainly provoked by the unprecedented rise of the digital economy which truly marked a change in the way business is conducted how value is created and how goods and services are produced and consumed Digitalization in turn had repercussions on all aspects of taxation direct taxation indirect taxation and even tax procedures For instance the quest for more justice and equality in profit taxes was the reason why in October 2021 a historical deal based on a two pillar solution to address the tax challenges arising from the digitalization of the economy was negotiated within the OECD G20 Inclusive Framework on Base Erosion and Profit Shifting and agreed upon by 137 member countries It was also the motive behind the shift from a typical vendor collection model to an intermediary

collection model supported by centralized registration points in indirect taxes notably the VAT GST Abundant data from the European Union or the OECD signalized an ever increasing gap between expected VAT revenues and VAT actually collected making it obvious that the classical system of VAT GST collection was unable to respond to challenges posed by the digital economy Therefore new solutions based on the participation of digital platforms as intermediaries had been introduced Finally new technologies such as blockchain paved new avenues in enhancing tax compliance In this context this volume entitled Justice Equality and Tax Law contains not only a selection of the best master s theses of the full time LL M programme in 2021 2022 but also represents an in depth analysis of various aspects of this evergreen topic

Studies in the History of Tax Law, Volume 11 Peter Harris, Dominic de Cogan, 2023-09-21 This book is a continuation of the prestigious series which is drawn from the papers of the biennial Cambridge Tax Law History Conference The authors are a mix of academics and senior tax professionals from the judiciary and practice with representatives from 9 countries The series continues to investigate current tax policy debates in an historical context The papers fall within 3 basic categories 1 UK and Irish tax looking at a variety of topics such as tax administration cases and judges Whitney Singer Viscount Radcliffe the taxation of royal forests the taxation of spirits and income tax transition in the Irish Free State 2 International taxation with chapters on the role of international organisations OECD League of Nations and on South Africa s early attempts to address double taxation tax treaties and 3 Non UK tax systems including chapters on the legacy of colonial influence Dutch East Indies early developments in China New Zealand and the USA an influential Canadian report Carter Commission development of the GAAR in Scandanavia and the receipt of Roman tax law in Europe
