

Burpee

TARGET: Quadriceps femoris (quads), gluteus maximus and minimus (glutes), hamstrings, erector spinae, rectus abdominis (abs), deltoids, forearms, triceps, biceps, gastrocnemius (calves)

STARTING POSITION: From an athletic position, hold a medicine ball to your chest with your arms bent.

1 Shift your hips backward and “sit back” into a squat (see page 5-4), keeping your head up and bending your knees. At the bottom of the downward motion, lean your weight forward and place the ball on the floor between your feet, engaging your core, chest, shoulders and arms to create a stable base.

2 Kick your feet straight back so that you’re now in a push-up position, forming a nice line from your head to your feet. Keep your core tight to maintain an erect spine.
