Kate Manne is the Simone de Beauvoir of the 21st century. Amanda Marcotte I want to press this book on every schoolgirl who thinks that feminism is uncool any woman who thinks the most important gender battles are won pretty much every man I know and say have you thought about this. Sophie McBain New Statesman Male entitlement takes many forms To sex yes but more insidiously to admiration bodily autonomy knowledge power even care. In this urgent intervention philosopher Kate Manne offers a radical new framework for understanding misogyny. In clear sighted powerful prose she ranges widely across the culture to show how the idea that a privileged man is tacitly deemed to be owed something is a pervasive problem. Male entitlement can

explain a wide array of phenomena from mansplaining and the undertreatment of women's pain to mass shootings by incels and the seemingly intractable notion that women are unelectable. The consequences for girls and women are often devastating. As Manne shows, toxic masculinity is not just the product of a few bad actors; we are all implicated, conditioned as we are by the currents of our time. With wit and intellectual fierceness, she sheds new light on gender and power and offers a vision of a world in which women are just as entitled as men to be cared for, believed in, and valued.

Girl Talk Jacqueline Mroz, 2018-11-13

A veteran science reporter's investigation into the fascinating and distinctive nature of women's friendships. In *Girl Talk*, New York Times science reporter Jacqueline Mroz takes on the science of female friendship, a phenomenon that is as culturally powerful as it is individually mysterious. She examines friendship from a range of angles, from the historical to the experiential, with a scientific analysis that reveals new truths about what leads us to connect and build alliances and then break up when a friendship no longer serves us. Mroz takes a new look at how friendship has evolved throughout history, showing how friends tend to share more genetic commonalities than strangers and that the more friends we have, the more empathy and pleasure chemicals are present in our brains. Scientists have also reported that friendship directly influences health and longevity: women with solid supportive friendships experience fewer fight or flight impulses and stronger heart function, and women without friendships tend to develop medical challenges on par with those associated with smoking and excessive body weight. With intimate reporting and insightful analysis, Mroz reveals new awareness about the impact of women's friendships and how they shape our culture at large.
