Office of Education,1951 The Path to Equity Bill Coplin,2023-07-03 Coplin has been saving students from the damage done by the bait and switch business model of the liberal arts programs for fifty years The bait promises career preparation and the switch is to teach undergraduates how to be scholars He demonstrates how the Kingdom of Liberals Arts programs are based on an elitist attitude that is harmful to most undergraduates who value career preparation over love of learning This elitism leads to increased anxiety for college students and a college completion rate lower than the worst high schools in the U S He shows how the elitism does not serve equity and inclusion but does the opposite He demonstrates that the harm is not just confined to undergraduate education but to many socio economic conditions in American society The Kingdom has contributed to a K 12 education system that sends too many students to college and prevents the resources needed for careers without a college education It shares some of the blame for the lack of skill and semi skilled labor in this country Coplin ends on a positive note by showing that some progress in transforming the Kingdom to an institution that serves its undergraduates has occurred but much more needs to be done He suggests three most important structural changes need to quicken the pace of change and contribute to rather than prevent equity and inclusion **STEM Education in US Prisons** ,2024-03-18 Renewal of higher education programs in US prisons creates a need for science education This is the first book to address STEM education in prisons in the United States It calls on activist science teachers to develop innovative ways to teach in challenging carceral settings Over the last fifty years science education and prison education have moved in different directions one expanding and the other contracting This book brings these educational endeavors into cooperative engagement Democratic citizenship opens opportunities for all people irrespective of civil status to study science The book presents student narratives and case studies emphasizing the achievements of STEM education behind prison walls STEM education equity can help address the deep social inequities that mass incarceration creates and magnifies Contributors are Cassandra Barrett Andrew Bell George Bogner Adrian Borealis Drew Bush Kelli Bush Sandy Chang Kelle Dhein Amalia Handler Steven Hart Steven Henderson Tiffany Hensley McBain Paul Kazelis Joe Lockard Edward Mei Tsafirir Mor Rob Scott Laura Taylor Joslyn Rose Trivett and Emily Webb *Getting a Job in the IT Industry* Mary-Lane Kamberg,2016-07-15 In our modern digital world and information

economy information technology IT specialists maintain the vast and constant flow of information and e commerce throughout the nation and world This book gets readers started on the road to landing a job in a lucrative and fascinating field that will only continue to expand in the coming years Whether managing office computer systems building and overseeing databases and other network and telecommunications infrastructure or working at a customer help desk novice IT hopefuls will find concrete beginning steps to their education and career in this book including techniques and tips for their job searches and general career advancement

Modern Educational Methods and Strategies in Teaching

Mathematics Yousef Methkal Abd Algani, Jamal Eshan, 2022-11-18 This book looks into the subject of classroom mathematics education It shows that students understanding and enthusiasm in mathematics grow as they progress through elementary school as do their thinking skills It defines the five building blocks of learning mathematics for primary school children as well as the motivational and affective determinants in elementary school mathematics The book also argues that mathematical aptitude is critical for a society s economic success as other professions such as engineering sciences social sciences and even the arts require a strong grasp of the field Thus in secondary mathematics education the formation of identity as well as how students prefer to learn is stated The text includes an overview of curriculum design and the main components of curriculum development It shows that mathematics education and learning may be viewed as a progressive system and emphasizes the importance of student involvement in learning
