South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Remaking Market Society Antonino Palumbo, Alan Scott, 2017-07-14 Neoliberalism has been one of the most hotly contested themes in academic and political debate over the last 30 years Given the global and persistent influence of neoliberal ideas on contemporary styles of governance social service provision and public policy this intensive interest is understandable At the same time the use of the term has become loose vague and over extended particularly in the extensive critical literature Rather than engage in further critique or in the reconstruction of the history of neoliberalism this volume seeks to bring analytical clarity to the ongoing debate Drawing inspiration from the work of the Hungarian economic historian Karl Polanyi *Remaking Market Society* combines critique original formulations and case

studies to form an analytical framework that identifies the key instruments of neoliberal governance These include privatization marketization and liberalization The case studies examine the development of neoliberal instruments reform of the British civil service their refinement reform of higher education in England and Wales and their dissemination across national borders EU integration policies Rather than look back nostalgically on the post war welfare state settlement in the final chapter the authors ask why the coalitions that supported that settlement broke down in the face of the neoliberal reform movement This highly original work offers a distinctive transdisciplinary approach to political economy and therefore is an important read for students and academics who are interested in political economy as well as social theory and political philosophy Management Accounting Research ,1999 Women and Sustainability in Business Kiyomet

The evolving livestock sector in Ethiopia: Growth by heads, not by productivity

Bachewe, Fantu Nisrane, Minten, Bart, Tadesse, Fanaye, Taffesse, Alemayehu Seyoum, 2018-08-09 Livestock is important in Ethiopia's agricultural economy as almost all farmers own some livestock Livestock assets are valued at 720 USD per farm on average Overall livestock output has grown rapidly over the last decade estimated at almost 6 percent per year but about 80 percent of that growth came from increases in the number of livestock The stock of different livestock species was about 50 percent higher in 2015 than a decade earlier while modern input use and improvements in production methods contributed little to growth in the livestock sector Linked to improved access to extension and markets adoption of improved breeds and improved feeding practices increased but such adoption patterns started from a very low base Within the livestock sector cattle are dominant making up an estimated three quarters of the value of livestock stock However the share of cattle in total livestock output is declining and small ruminants are on the rise especially in pastoralist areas Given the rapid growth in livestock numbers and the increasing livestock density per unit of land we find that feeding practices are changing Grazing land is declining in availability so reliance on commercial feed markets is increasing Access to vaccinations and veterinary service provision have improved and livestock death rates declined slightly over the last decade However the number of livestock lost to deaths is still more than twice the number sold for meat production indicating important challenges remaining for the development of the livestock sector in Ethiopia

Elements of Statistics Raghubar D. Sharma, 2019-02-01 This book represents a crucial resource for students taking a required statistics course who are intimidated by statistical symbols formulae and daunting equations It will serve to prepare the reader to achieve the level of statistical literacy required not only to understand basic statistics but also to embark on their advanced level statistics courses without anxiety The application of statistics in social research has recently become imperative However a gap usually exists between the time when students take their first statistics course and when they engage in their first serious research project meaning that they often don't remember basic statistics well enough to apply it effectively in their research In this sense this book will also serve as an excellent desk reference refresher or core concept text for burgeoning researchers interning or working as a research assistant or research associate
