[Mindset Matters](#) Daniel R. Porterfield,2024-06-25 How colleges can foster growth mindsets among students and why this approach matters We live in an era of escalating tech fueled change Our jobs and the skills we need to work and thrive are constantly evolving and those who can t keep up risk falling behind That s where college comes in In Mindset Matters Daniel R Porterfield advances a powerful new argument about the value of residential undergraduate education and its role in developing growth mindsets among students The growth mindset according to Porterfield is the belief that we can enhance our core qualities or talents through our efforts strategies and education and with assistance from others People with growth mindsets have faith in self improvement They tend to be goal oriented and optimistic confident that they can master new challenges because they ve done so in the past Feedback is their friend errors their opportunities to begin again For students like this college is a multiyear process of self creation and self emergence a becoming that

unfolds because they are applying themselves in a place rich with stimulating people happenings resources and ideas America s colleges and universities help students build the skills and self confidence they need for lifelong discovery creativity mentorship teamwork and striving These five mindsets the book argues are critical for thriving in disruptive times and students who develop them will reap the rewards long after they graduate To show how college activates these mindsets and why it matters Porterfield shares the personal stories of thirty recent graduates many the first in their families to attend college Their growth was both self powered and supported by involved faculty engaged peers and opportunity rich campuses Porterfield also outlines how colleges and universities can do more to foster cultures of mentoring and personalized learning that help students become leaders of their own learning
