EBOOK: Developing Writers: Teaching and Learning in the Digital Age Richard Andrews,Anna Smith,2011-07-16 This book takes a fresh look at what it means to learn and develop as a writer in response to concerns on both sides of the Atlantic and elsewhere in the world about standards in writing In this

book the authors seek answers to some perennial questions Why does performance in writing tend to lag behind that in reading Are the productive skills of speaking and writing more difficult because they require the learner to make something new What does it mean to develop as a writer This book provides the foundation for developing the teaching of writing It does so by Reviewing and comparing models of writing pedagogy from the last fifty years Discussing the notion of development in depth Developing a new theory and model for writing in the multimodal and digital age Its basic premise is that writing needs to be re conceived as one crucial component of communication among other modes Andrews and Smith argue that although existing theories have provided insights into the teaching and learning of writing we need to bring such theories up to date in the digital and multimodal age Developing Writers is designed for teachers academics researchers curriculum designers parents and others who are interested in writing development It will also be intended for anyone who is interested in developing their own writing and who wishes to understand the principles on which such development is based Continue the conversation at www.developingwriters.org

the Translation of Literary Style Roy Youdale, 2019-06-13 This volume argues for an innovative interdisciplinary approach to the analysis and translation of literary style based on a mutually supportive combination of traditional close reading and distant reading involving corpus linguistic analysis and text visualisation The book contextualizes this approach within the broader story of the development of computer assisted translation including machine translation and the use of CAT tools and elucidates the ways in which the approach can lead to better informed translations than those based on close reading alone This study represents the first systematic attempt to use corpus linguistics and text visualisation in the process of translating individual literary texts as opposed to comparing and analysing already published originals and their translations Using the case study of his translation into English of Uruguayan author Mario Benedetti's 1965 novel *Gracias por el Fuego* Youdale showcases how a close and distant reading approach CDR enhances the translator's ability to detect and measure a variety of stylistic features ranging from sentence length and structure to lexical richness and repetition both in the source text and in their own draft translation thus assisting them with the task of revision The book reflects on the benefits and limitations of a CDR approach its scalability and broader applicability in translation studies and related disciplines making this key reading for translators postgraduate students and scholars in the fields of literary translation corpus linguistics corpus stylistics and narratology
