

Behavior Rating Inventory of Executive Functions, Second Edition (BRIEF-2) The BRIEF-2 assesses impairment of executive function in children and adolescents ages 5-18 years. A self-report is available for children ages 10-18 years. According to Gioia, Isquith, & Guy, 2000, executive function is a collection of interrelated functions, or processes, that are responsible for goal-directed behavior and cognitive activity—that is, as the “conductor of the orchestra” that controls, organizes, and directs cognitive activity, behavior, and emotional responses. Therefore, executive functions are not exclusive to cognition but are reflected in behavior and emotional control. The raw scores are converted to T-scores with a mean of 50.
