 Weil, 2014-02-17 In the twentieth century large companies employing many workers formed the bedrock of the U S economy
 Today on the list of big business s priorities sustaining the employer worker relationship ranks far below building a devoted
 customer base and delivering value to investors As David Weil s groundbreaking analysis shows large corporations have shed
 their role as direct employers of the people responsible for their products in favor of outsourcing work to small companies
 that compete fiercely with one another The result has been declining wages eroding benefits inadequate health and safety
 protections and ever widening income inequality From the perspectives of CEOs and investors fissuring splitting off functions
 that were once managed internally has been phenomenally successful Despite giving up direct control to subcontractors and
 franchises these large companies have figured out how to maintain the quality of brand name products and services without
 the cost of maintaining an expensive workforce But from the perspective of workers this strategy has meant stagnation in
 wages and benefits and a lower standard of living Weil proposes ways to modernize regulatory policies so that employers can
 meet their obligations to workers while allowing companies to keep the beneficial aspects of this business strategy
