The Genesis of Germs Alan Gillen, 2007 As the world waits in fear the CDC and world health organizations race to minimize the current pandemic a looming threat that has forced international federal and local governments to deal with COVID19 and other future epidemics and the widespread death and devastation which would follow Will the world find the answers in time Or will we see a deadly threat ravage populations as others have before in 1918 with influenza in the late 18th century with yellow fever or the horrific black death or bubonic plague in 1347 AD Are these viruses examples of evolution Did God make microbes by mistake Are they accidents of evolution out of the primordial soup These timely questions are examined throughout this book from chapter 1 It seems that a new and more terrible disease is touted on the news almost daily The spread of these scary diseases from avian flu to SARS to AIDS is a cause for concern and leads to questions such as Where did all these germs come from How do they fit into a biblical world view What kind of function did these microbes have before the Fall Does antibiotic resistance in bacteria prove evolution How can something so small have such a huge deadly impact on the world around us Professor Alan Gillen sheds light on these and many other questions in this revealing and detailed book He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ **Critical Care**

Nursing Leanne Aitken, Andrea Marshall, Wendy Chaboyer, 2019-08-19 Increased global considerations relevant to international context of critical care nursing alongside its key focus within the ANZ context Aligned to update NMBA RN Standards for Practice and NSQHS Standards An eBook included in all print purchases Principles of Toxicology Stine Karen, Thomas M. Brown, 1996-06-27 Written by two experienced toxicology lecturers Principles of Toxicology is an easy to read comprehensive textbook for a first course in toxicology at the undergraduate or graduate level filling the acute need for a well rounded introductory text Students will no longer need to struggle with material that is too difficult or that has too narrow a toxicological focus Principles of Toxicology covers this broad and interdisciplinary field from the viewpoint of three different functional levels molecular and cellular physiological and environmental and ecological Within each chapter the authors combine background material with new information in a manner that stresses principles and concepts These principles are then illustrated with selected specific examples This design helps students focus on understanding the subject rather than simply memorizing details Your search for the perfect introductory toxicology text is over Principles of Toxicology elegantly facilitates the teaching and learning of this challenging subject **The Senses** Douglas B. Light, Denton A.

Cooley, 2009 Gain a better understanding of how your senses function and how sense organs act as physical links between your brain and the environment **SBAs for the MRCOG Part 1** Babu Karavadra, Richard A. Haines, Medha
