  AI 2015: Advances in Artificial Intelligence Bernhard Pfahringer,Jochen Renz,2015-11-21 This book constitutes the refereed proceedings of the 28th Australasian Joint Conference on Artificial Intelligence AI 2015 held in Canberra Australia in November December 2015 The 39 full papers and 18 short papers presented were carefully reviewed and selected from 102 submissions *Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications* Wang, John,2008-05-31 In recent years the science of managing and analyzing large datasets has emerged as a critical area of research In the race to answer vital questions and make knowledgeable decisions impressive amounts of data are now being generated at a rapid pace increasing the opportunities and challenges associated with the ability to effectively analyze this data **Encyclopedia of Information Science and Technology, First Edition** Khosrow-Pour, D.B.A., Mehdi,2005-01-31 Comprehensive coverage of critical issues related to information science and technology **Managing Your Software Project** Ian Ricketts,2012-12-06 About this Book I wrote this book to help students who are about to start their first project It provides guidance on how to organise your work so that you achieve your agreed objective The advice is based on experience gained from supervising more than 50 successful student projects in both engineering and computer science during the last 10 years Projects have varied in duration from 120 hour final year undergraduate projects through 800 hour MSc projects and up to 5000 hour PhD student research projects It is my experience that almost all students have the technical background to a greater or lesser extent to complete their assigned project but that a disappointingly large number lack the basic organisational framework Once they are introduced to the rudiments of project management then they are better equipped to control their own progress They can also concentrate their efforts more effectively on the technical challenges which they will inevitably meet Of course you can improve your skills solely on the basis of personal experience but you are more likely to achieve your objectives in a timely manner with the help of an experienced guide That is what I have tried to include within this book It contains advice on how to solve some of the organisational challenges common to all projects so that you can successfully complete your project Neural Networks for Identification, Prediction, and Control D. T. Pham,1995 This publication describes examples of applications of neural networks in modelling prediction and control Topics covered include identification of general linear and nonlinear processes forecasting of river levels stock market prices currency exchange rates and control of a time delayed plant and a two joint robot The neural network types considered are the multilayer perceptron MLP the Elman and Jordan networks the Group Method of Data Handling GMDH the cerebellar

model articulation controller CMAC networks and neuromorphic fuzzy logic systems The algorithms presented are the standard backpropagation BP algorithm the Widrow Hoff learning dynamic BP and evolutionary learning Full listings of computer programs written in C for neural network based system identification and prediction to facilitate practical experimentation with neural network techniques are included **Introduction To Knowledge Information Strategy, An: From Business Intelligence To Knowledge Sciences** Akira Ishikawa,Juro Nakagawa,2013-02-21 This book discusses the essence concepts techniques and applications of business intelligence It also explores different aspects of crisis management knowledge management and knowledge sciences the applications of business intelligence in contingencies and crises environmental issues and group intelligence The book is divided into three parts The first part focuses on the significance of business intelligence competition and intelligence competitive information strategy conflicts on patent issues and the current state of the art of business intelligence education in the US and France The second part encompasses business intelligence and risk and crisis management ecological issues and crisis management business intelligence and knowledge management and business intelligence as an organizational knowledge The third part consists of case studies in business intelligence with special reference to the retail industry and the military arena This part also focuses on applications of business intelligence Finally the book also envisages the future direction of knowledge information strategy It will be of interest to students academicians and people working in non profit or non government organizations Economics of Betting Markets David Peel,2013-09-13 During the last few decades commercial gambling has increased substantially throughout the Western world More people than ever before have access to sources of legalised gambling leading to bumper revenues for the institutions involved Naturally enough this has led to an increased interest in the area of the economics of betting This book addresses the issues raised by the continued growth of the gambling sector How can we model the behaviour of people who seemingly act irrationally What are the implications of different tax policies with regard to gambling Are casinos capable of taking money away from state run lotteries and the causes they fund Can bookmakers odds be influenced in such a way as to make the gambling market inefficient The authors in this volume provide insights based on data from many different countries including England the USA Australia Spain and Cyprus This volume brings together work which addresses the economic impact of the huge growth of commercial gambling in the Western world as well as trying to model the cognitive processes which can explain why individuals are prepared to behave in such apparently irrational ways This book was published as a special issue of Applied Economics The academic editor of this journal is Mark P Taylor The Palgrave International Handbook of Animal Abuse Studies Jennifer Maher,Harriet Pierpoint,Piers Beirne,2017-07-12 This Handbook fills a large gap in current scholarly literature on animal abuse studies It moves considerably beyond the debate that has traditionally dominated the discourse of animal abuse the link between one on one interpersonal violence and animal abuse and towards those institutionalised forms of animal abuse which are routine everyday socially acceptable and invisibilised Chapters from
