Handbook of Research on Global Education and the Impact of Institutional Policies on Educational Technologies Loureiro, Maria José, Loureiro, Ana, Gerber, Hannah R., 2021-11-12 Emerging technologies in education are dramatically reshaping the way we teach, learn and create meaning both formally and informally. The use of emerging technologies within educational contexts requires new methodological approaches to teaching, learning and educational research. This leads educational technology developers, researchers and practitioners to engage in the creation of diverse digital learning tools that can be used in a wide range of learning situations and scenarios. Ultimately, the goal of today's digital learning experiences includes situational experiences wherein learners and teachers symbiotically enroll in meaning-making processes. Discussion, critical reflection and critique of these emerging technologies, tools, environments, processes and practices require scholars to involve themselves in critical conversation about the challenges and promises afforded by emerging technologies and to engage in deliberate thinking about the critical aspects of these emerging technologies that are drastically reshaping education. The Handbook of Research on Global Education and the Impact of Institutional Policies on Educational Technologies deepens this discussion of emerging technologies in educational contexts and is centered at the intersection of educational technology, learning sciences and socio-cultural theories. This book engages a critical conversation that will further the discussion about the pedagogical potential of emerging technologies in contemporary classrooms. Covering topics such as communication networks, online learning environments and preservice teacher education, this text is an essential resource for educational professionals, preservice teachers, professors, teachers, students and academicians.

New Perspectives on Individual Differences in Language Learning and Teaching Mirosław Pawlak, 2012-04-05 The volume constitutes an attempt to capture the intricate relationship between individual learner differences and other variables which are of interest to theorists, researchers and practitioners representing such diverse branches of applied linguistics as psycholinguistics, sociolinguistics, pragmatics or language teaching methodology. It brings together contributions by Polish and international authors including leading experts in the field touching upon changing perspectives on individual variation, cognitive, affective and social variables, learning deficits as well as their impact on learning and teaching. It offers a multifaceted perspective on these problems and shows how theory and research can be translated into classroom practice.
