Inside-Out Smanu, 2014-08-21 This book is a speck of fire from man's inherent quest to be at a perfect self-contented oneness with nature Today's rat race towards technological development might have thrust man to lack awareness of that quest In fact the human journey and conditioning itself has an inherent character of making him lack awareness of his pristine aspects This book is a humble effort in reminding man of his own quest in facilitating him to get in touch with the truth long suppressed and forgotten The growing imbalance in the society is finding its expression not merely as the materialistic gap between haves and have-nots but also in the form of Kundalini Consciousness Awakening in more and more people The spiritual deficit of the human collective is manifesting as spiritual burden on some We know the many scientific laws of conservation don't we Among other things the book propounds a possibility that our incapacity to comprehend God might be the limitation of human evolution as of now As much as the book talks about God Spirituality and Mysticism the book is more an effort in questioning the sufficiency of science for current needs of human evolution Time has come for man to expand his horizons not through Technology but by regaining his roots of spiritual strength and in the process expand the horizons of science No development can be linear and no one instrument can prove self-sufficient for human evolution In that sense Science has reached its threshold Yet Science with Heart is waiting to be discovered and explored through the reinstatement of Trinity and Balance in the world This book might not contain any new spiritual talk or wisdom for the spiritually inclined But it might make a very interesting read for those who are not spiritually inclined yet And when we realize that the term spiritually inclined is a misnomer for we are the spirit the purpose behind this book would have been fulfilled
