IBM System Storage Open Systems Tape Encryption Solutions Alex Osuna, Luciano Cecchetti, Edgar Vinson, IBM Redbooks, 2010-12-08. This IBM Redbooks publication discusses IBM System Storage Open Systems Tape Encryption solutions. It specifically describes Tivoli Key Lifecycle Manager (TKLM) Version 2 which is a Java software program that manages keys enterprise wide and provides encryption enabled tape drives with keys for encryption and decryption. The book explains various methods of managing IBM tape encryption. These methods differ in where the encryption policies reside, where key management is performed, whether a key manager is required and if required how the tape drives communicate with it. The security and accessibility characteristics of encrypted data create considerations for clients which do not exist with storage devices that do not encrypt data. Encryption key material must be kept secure from disclosure or use by any
