

The background of the book cover is a stylized, high-contrast illustration of a globe. The continents are depicted in white and light gray, while the oceans are in dark blue and black. The globe is shown from a perspective that makes it appear to be a cluster of spheres, with several overlapping views of the Earth's surface. The overall style is graphic and modern.

Ten Lessons for a Post-Pandemic World Fareed Zakaria, 2020-10-06 From the international bestselling author of The Post American World An intelligent learned and judicious guide for a world already in the making The New York Times Since the end of the Cold War the world has been shaken to its core three times 11 September 2001 the financial collapse of 2008 and most of all Covid 19 Each was an asymmetric threat set in motion by something seemingly small and different from anything the world had experienced before Lenin is supposed to have said There are decades when nothing happens and weeks when decades happen This is one of those times when history has sped up In this urgent and timely book Fareed Zakaria one of the top ten global thinkers of the last decade Foreign Policy foresees the nature of a post pandemic world the political social

technological and economic consequences that may take years to unfold In ten surprising hopeful lessons he writes about the acceleration of natural and biological risks the obsolescence of the old political categories of right and left the rise of digital life the future of globalization and an emerging world order split between the United States and China He invites us to think about how we are truly social animals with community embedded in our nature and above all the degree to which nothing is written the future is truly in our own hands Ten Lessons for a Post Pandemic World speaks to past present and future and will become an enduring reflection on life in the early twenty first century *Complex Systems and Social Practices in Energy Transitions* Nicola Labanca,2017-05-02 This book offers an interdisciplinary discussion of the fundamental issues concerning policies for sustainable transition to renewable energies from the perspectives of sociologists physicists engineers economists anthropologists biologists ecologists and policy analysts Adopting a combined approach these are analysed taking both complex systems and social practice theories into consideration to provide deeper insights into the evolution of energy systems The book then draws a series of important conclusions and makes recommendations for the research community and policy makers involved in the design and implementation of policies for sustainable energy transitions International Trade Policy Nigel Grimwade,2006-06-28 This volume provides an introduction to the basic theory behind international trade policy The author analyses current policy issues within a theoretical framework The book adopts a thematic approach with each chapter examining a different issue each of which is of central importance to contemporary trade policy The book will be essential for all those who want to understand what governments do in terms of trade policy and how they do it

Business Groups and Financial Markets Sandro Segre,2017-07-12 This work builds on the classical sociological contributions of Weber Simmel and Toennies and makes the case for different and alternative ideal typical models of business relations which the author calls English and German The English model of business relations is characterized by free competition between firms They abide by the ethical rules of fair business and the moral economy in market exchanges Their relations are accordingly based on mutual trust As a rule they do not cultivate privileged relations with political authorities By contrast the German model involves hierarchical relations between a group s major firm and its smaller units There is no moral community binding together the different groups and therefore no mutual trust between them Business groups maintain close relations based on reciprocal favours with authorities The author compares the London and New York Stock Exchanges in the late nineteenth century finding the former better approximates the English model and shows this model s superior performance English model countries such as Taiwan have been shown to be more competitive in market exchanges than countries such as South Korea which approximate the German model A new epilogue makes use of more recent information and confirms Segre s arguments **A Weberian Analysis of Business Groups and Financial Markets** Sandro Segre,2017-11-30 Moral economy as a set of rules which regulate market transactions has been the object of much research and debate since the 1980s it has also been the focus of classical sociological authors such as Weber

Simmel and Toennies Weber in particular examined the rules of the moral economy in the financial markets and this volume sheds light on his contribution to the subject The book formulates two models of business relations one oligopolistic model the other based on free competition which are derived from Weber and Simmel s writings and which represent alternative instances of the moral economy Empirical case studies in the form of South Korea and Taiwan are included to exemplify the two models and to highlight the consequences of adopting one model over the other The volume also examines the conduct of actors in some of the leading financial markets with reference to Weber s writings on the 19th century London and Berlin Stock Exchanges Multinational Corporations and the Emerging Network Economy in Asia and the Pacific Juan J.

Palacios,2008-03-25 Multinational Corporations and the Emerging Network Economy in Asia and the Pacific delves into the ongoing rise of a global economy anchored in a web of inter firm production networks and the role played by multinational corporations in the process It considers the strategies and business models corporations have adopted lately to face today s highly competitive global markets especially outsourcing and offshoring focusing on the modalities observed in Asia Pacific and the Pacific Rim at large Since their inception corporations have undergone a series of fundamental changes each has corresponded to a given era of industrial development and has given rise to a particular type of government policy response The book addresses these timely issues and other such as the transformation of global production networks into global innovation networks the link between corporate and national innovation strategies and movement up the global production value chain and the fragmentation of production and the resulting increase in component and sub assembly trade in the region It also takes up the emergence of multinational corporations from developing countries and the efforts aimed at forging basic rules of corporate social responsibility and developing sound institutions for building a working framework of corporate governance in the Pacific Written by some of the region s most eminent and influential economists and political scientists this volume will appeal to students and scholars working in the field of Asia Pacific studies as well as to businesspersons and policymakers taking decisions in the region *China's Economic Culture* Carsten

Herrmann-Pillath,2016-10-04 China s spectacular rise challenges established economic moulds both at the national level with the concept of state capitalism and at the firm level with the notion of indigenous Chinese management practices However both Chinese and Western observers emphasise the transitional nature of the reforms thereby leaving open the question as to whether China s reform process is really a fast catch up process with ultimate convergence to global standards or something different This book by a leading economist and sinologist argues that culture is an exceptionally useful tool to help understand fully the current picture of the Chinese economy Drawing on a range of disciplines including social psychology cognitive sciences institutional economics and Chinese studies the book examines long run path dependencies and cultural legacies and shows how these contribute crucially to the current cultural construction of economic systems business organisations and patterns of embedding the economy into society and politics Economics of Energy Security Honorata

Nyga-Łukaszewska,2023-12-01 There has been a burgeoning interest in energy security in recent years due to the transformation of the energy landscape through deepening market deregulation rising environmental challenges growing energy hunger and significant political changes Depicting energy security as an evolving concept that absorbs economic and political conditions this book adopts an economic approach to energy security in the international gas market Uniquely the book explores the theoretical assumptions and practical consequences attached to both demand and supply side security in global energy markets It investigates why energy exporters are so protective of independence in energy exports The book also looks at the critically important issue of environmental aspects of energy security particularly around climate change It also analyses the potential for a cartel in the international gas market similarly to the oil industry This book will be of much interest to readers in energy economics energy security energy policy IR security studies and relevant policy makers

Growing Livelihoods Rhonda Phillips,Chris Wharton,2015-11-19 Community planning is starting to include a broader food systems focus spanning topics such as nutrition and health outcomes sustainable farming practices economic and social implications of local food production distribution and consumption Together these issues are a driving force for the passions of those seeking positive change in their communities through healthy food The purpose of this book is to explore how and where local food and farms as part of a local or regional food system can positively impact both economic development and overall well being of communities Across North America there are good examples of the ways in which innovative local food systems provide opportunities for increasing job growth and entrepreneurship retaining local farmers on their land while nourishing their community and providing communities places to congregate bond and become closer knit Six such examples are highlighted each illustrating a novel model offering unique contributions to community economic health and well being These important cases offer practitioners advocates academics and students insight into how applications can be built or studied in their own communities

Lifestyle Media in Asia Fran Martin,Tania Lewis,2016-05-20 Across Asia consumer culture is increasingly shaping everyday life with neoliberal economic and social policies increasingly adopted by governments who see their citizens as individualised sovereign consumers with choices about their lifestyles and identities One aspect of this development has been the emergence of new wealthy middle classes with lifestyle aspirations shaped by national regional and global media especially by a range of new popular lifestyle media which includes magazines television and mobile and social media This book explores how far everyday conceptions and experiences of identity are being transformed by media cultures across the region It considers a range of different media in different Asian contexts contrasting how the shaping of lifestyles in Asia differs from similar processes in Western countries and assessing how the new lifestyle media represents not just a new emergent media culture but also illustrates wider cultural and social changes in the Asian region

Economic Development in Rural Areas Peter Dannenberg,Elmar Kulke,2016-03-09 Analysing the ongoing changes and dynamics in rural development from a functional perspective through a series of case studies from the

global north and south this volume deepens our understanding of the importance of new functional and multifunctional approaches in policy practice and theory In rural areas of industrialized societies food production as a basis for growth and employment has been declining for many decades In the Global South on the other hand food production is still often the most important factor for socio economic development However rural areas both in the industrialized north and in the global south are facing new challenges which lead to significant changes and threats to their development New forms of food production but also new functional e g housing or business parks and often multifunctional approaches are being discussed and practiced yet it remains unclear the extent to which these result in better or more sustainable development of rural areas

Reader's Guide to the Social Sciences Jonathan Michie, 2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense
