**The Complete Technology Book on Electroplating, Phosphating, Powder Coating And Metal Finishing** NIIR Board, 2005-10-04 Electroplating and Metal Finishing concerns itself with the development and applications of composites and non metallic coatings These coatings are used for decorative protective and functional application Some of the other common metal surface finishing technologies are phosphating pickling electroforming powder coating etc

Electroplating is the process of applying a metallic coating to an article by passing an electric current through an electrolyte in contact with the article thereby forming a surface having properties or dimensions different from those of the article Metal finishing has now come to be known as surface engineering Surface engineering techniques are generally used to develop a wide range of functional properties In addition to the decorative aspects metal finishing aids the protection of metals and alloys from corrosion and rusting A great potential exists for development of new materials involving for example coatings of metals composites particle incorporated anodic coatings and even films of sapphire like materials porous films of niobium etc and coating of refractory metals like molybdenum and tungsten Phosphate coatings have a wide field of application in manufacturing industry both as an aid to mechanical production operations and in surface finishing The major applications for phosphate treatments fall into four areas pre treatment prior to organic coatings protection against corrosion anti wear coatings and phosphating as a production aid Powder coating of aluminium extrusions in particular has become an important feature in the finishing of aluminium There are several advantages of powder powder coating overspray can be recycled and thus it is possible to achieve nearly 100% use of the coating powder coating production lines produce less hazardous waste than conventional liquid coatings capital equipment and operating costs for a powder line are generally less than for conventional liquid lines Surface finishing is a broad range of industrial processes that alter the surface of a manufactured item to achieve a certain property Currently the trend is towards surface treatments Industries in developing countries like India have to be increasingly aware of the need not only for up gradation of existing technologies but also for indigenization of new technologies on a time bound basis The content of the book includes information about technology involved in surface engineering of metals some of them are electroplating plant barrel plating plant electroplating equipment cleaning pickling and dipping equipment for hot alkaline cleaners electrolytic and chemical processes for the polishing of metals canning stainless steel electro polishing solution electroforming in gramophone record production silver plating fluoborate plating gold plating gilding cadmium plating zinc plating chemical finishing of aluminium powder coating of aluminium bright nickel electro plating copper plating etc This book covers an intensive study of technology of electroplating phosphating powder coating and metal finishing The first hand information on these technologies is dealt in the book and can be very useful for those looking for entrepreneurship opportunity in the said industry TAGS Electroplating Plant Automatic Equipment Surface Coatings and Treatments Electroplating and Coating Plants Electroplating Plant Equipment Powder Coating Plants Powder Coating Equipments How to Start Powder Coating Business Powder Coating Business Plan Business Plan on Powder Coating Start Powder Coating Business Start High Profit Powder Coating Business Starting Metal Polishing Business Electroplating Business Gold Plating Business How to Start Metal Plating Business Starting Zinc Plating Business How to Start Electroplating Business How to Start Metal Finishing Business Starting Metal Polishing Business Metal Finishing Industry Business Plans for Metal Finishing Zinc Plating Process Zinc Plating Plant Electroplating Plant for Acid Zinc Electroplating
