Financial Intelligence Karen Berman, Joe Knight, John Case, 2006 Companies expect managers to use financial data to allocate resources and run their departments But many managers can t read a balance sheet wouldn t recognize a liquidity ratio and don t know how to calculate return on investment Worse they don t have any idea where the numbers come from or how reliable they really are In Financial Intelligence Karen Berman and Joe Knight teach the basics of finance but with a twist Financial reporting they argue is as much art as science Because nobody can quantify everything accountants always rely on estimates assumptions and judgment calls Savvy managers need to know how those sources of possible bias can affect the financials and that sometimes the numbers can be challenged While providing the foundation for a deep understanding of the financial side of business the book also arms managers with practical strategies for improving their companies performance strategies such as managing the balance sheet that are well understood by financial professionals
