Ahmed, 2016-05-23 In Conceptions of Professionalism Ken Bruce and Abdullahi Ahmed present the results of research into understanding what professionalism means to individuals who are CERTIFIED FINANCIAL PLANNERTM professionals and how they conceive of acting professionally. Financial planning is establishing itself as a relatively new emerging profession and an understanding of how its members experience professionalism provides insights that will help those responsible across the international financial planning community to establish relevant accurate and meaningful professional standards for financial planners. The authors employ the relatively new research methodology of phenomenography which enables them to describe the qualitatively different ways in which people understand or experience a phenomenon. This particularly lends itself to the study of a concept such as professionalism. This study gives voice to the financial planners represented in the research and will inform standard setting bodies seeking to understand professionalism through the eyes of the professionals themselves. What the research reveals about the concept of professionalism itself will be of value to those whose interests lie beyond the world of financial planning and the application of the methodology used in the study will inform researchers contemplating phenomenographical studies elsewhere. **Cybernetic Approach to Project Management** Bogdan Lent, 2014-07-08 This book attempts to reflect the project reality as closely as possible covering the ISO 21500 2012 standard that has just been introduced and the benefits from the best contributions worldwide and also providing the concise yet powerful tool box. It shall be easy to use and intuitively supportive of project managers. So far, evidence indicates that these targets are successfully met. One of its key recognitions and in consequence a distinctive feature of this book is the impact that the project manager's personality has on the fate of the project. The project manager's successful self-management in work life and in leadership processes should be considered as important in any endeavor as all other project management processes covered by the new standards and guidelines. Entrepreneurship in Africa Ven

Sriram, David Lingelbach, Tigineh Mersha, Franklyn Manu, 2020-11-16 It is now widely recognized that in regions like Africa for economic and other reasons the public sector has had to disengage and divest from many areas of the economy and allow private enterprise especially scalable start ups and new ventures to enter and flourish if economic development and employment are to grow There is however a training and education gap since entrepreneurship is rarely taught formally at African universities and when it is it is often approached from a Western perspective which may not be appropriate given that African environments are significantly different from most Western ones in terms of economic infrastructure and political considerations This book allows readers to understand the African entrepreneurial context by guiding them through the principal stages in the life of a new venture and offers approaches both Western and indigenous that can inform their entrepreneurial actions It concludes by examining some specialized topics including female youth and social entrepreneurship as well as real estate and technology Exercises throughout the book will enable readers to evaluate their motivations and preparedness for entrepreneurship and learn how to communicate a new venture's key features to potential stakeholders By focusing on the distinctive features of entrepreneurship in the African context and taking a conversational tone this is an informative and practical text that will be useful for students of Global Entrepreneurship and Business as well as actual and prospective entrepreneurs in the private non profit and public sectors
