The Future of Foods Maria G. Corradini,Tatiana Koutchma,Noemi Elisabet Zaritzky ,Isabel Sousa,2025-09-10
The future of food can take many avenues of exploration from the product itself such as unusual sources like grass microalgae acorns and so on to by products from the food industry e g fruit pomaces and brewer spent grains to disruptive technologies from data management and integration e g digital twins to processing e g additive manufacturing precision fermentations cell ag When considering the future of food sometimes this is

more accurately seen as the cycle of food Development is continual but sometimes to address the future we must look historically for example a resurgence in pulses for protein or the increase in shelf stable foods due to the Covid 19 pandemic The future of food requires many considerations such as life cycle assessment customization social impact environmental impact and economic impact In particular when developing new foods with sustainability in mind eg alternative proteins one has to take into account the health benefits as well as indulgence and sensory appeal and these factors must be weighed against the financial cost of the production processes and the ultimate cost to the consumer

The relations between climate change and child labour in agriculture Food and Agriculture Organization of the United Nations ,2023-06-07 Climate change related events undermine children s educational attainment exposing them to child labour hazardous work and forced migration This nexus is particularly relevant for agriculture and its subsectors indeed they absorb about 26 percent of the economic impacts of climate change related disasters and host 70 percent of all child labour This study aims to identify the extent to which climate change related events and impacts affect child labour in agriculture by

exploring the underlying connection between the two challenges as the initial step towards integrating a child labour lens within the international community's work on climate change. It showcases the multi-dimensional relationship through a mixed methods approach in four countries: Côte d'Ivoire, Ethiopia, Nepal, and Peru. The qualitative and quantitative findings propose a set of policy implications that are in line with the concept that one size fits all policy prescriptions are unlikely to work as they must be tailored to different communities based on their characteristics.

Alzheimer's Disease and Advanced Drug Delivery Strategies Bhupendra G. Prajapati, Dinesh Kumar Chellappan, Prakash Kendre, 2023-11-30. Alzheimer's Disease and Advanced Drug Delivery Strategies compiles under a single volume the most recent advances in drug delivery to the brain as related to AD treatment.
