## **Force 2025 And Beyond Arcic:**

Military Review ,2015      **Transformation of the Indian Armed Forces: 2025** Maj Gen A K Lal (Retd),2012-05-09

Transformation should lie at the heart of our new approach to defense The development of transformational capabilities processes and force structures should be given strategic focus to meet the principal challenges under our defense strategy India is already ceased with the necessity of transformation albeit without any documented national security guidelines or operating instructions which are legislated or have the validation of at least the Cabinet Committee on Security CCS In other words the first step would be to create a draft security strategy based on many assumptions like the foreign policy or the cumulative emerging threat scenario as appreciated by the Defence Intelligence Agency DIA This well researched book is a result of the project allotted by the USI under the Field Marshal K M Cariappa chair The book is therefore more as an idea or a theoretical construct basically to bring in more clarity to the various options available for this great transformation of the Indian military The author has deliberated upon various landmarks of transformation milestones achieved so far by the three services and given recommendations to further build upon ongoing modernization plan and shift to a higher plane of transformational activities      **Professional Journal of the United States Army** ,2015      **Global Strategic**

**Developments** The Emirates Center for Strategic Studies and Research,2012-06-19 The world today faces numerous challenges including the ongoing fallout from the financial crisis and varied and diverse examples of violence and conflict across the globe Combined with the many changes affecting both the regional and global balance of power such as the apparent decline of the United States the growing influence of the East and the evolving role of international organizations these challenges have led some to question how global power will be distributed in the coming two decades All nations are exposed to the influences of international policy and ongoing developments in the world order Understanding these developments as well as the associated implications for international security and stability enables national policy makers to identify and capitalize on strategic opportunities A future strategic vision for the Gulf must encompass a range of issues including internal regional and global aspects The states of the region must develop stronger domestic resilience by binding citizens to the state in a way that reduces its vulnerability to malign transnational forces Gulf states will wish to further deepen their links to the countries of the East particularly states such as South Korea Japan Australia China and India all of whom have different ways that they can contribute to regional stability They may also wish to be exporters rather than merely importers of security contributing to international missions authorized by the UN and other international bodies States that have this sense of international social responsibility become more vital to the global system as a whole The GCC states will also wish to revive and increase the flexibility of their regional security apparatus perhaps to engage Iran Iraq and Yemen and gain more control of immediate regional dynamics Driving regional security in this way will partly insulate the GCC countries from the diplomatic initiatives of others that may not be consistent with GCC interests Furthermore the GCC

states will seek to build stronger institutional links among themselves deepening the co operation and contacts between the civil servants of the member countries so that diplomacy between them is derived from disciplined organizational procedures Just as each state has to develop its domestic resilience so through institution building should the GCC strengthen its corporate resilience Overall the Gulf states need to develop an increasingly global outlook even as they deal with internal challenges They must find more ways to engage productively in the broader security dialogue of the region with outside actors from Europe North America and Asia In the age of globalization the states of the region need to be very mindful of the place good governance has in ensuring that the rest of international society is able to effectively engage with the Gulf states

*HyperNeutrosophic Set and Forest HyperNeutrosophic Set with Practical Applications in Agriculture* Takaaki Fujita, Florentin Smarandache, The Neutrosophic Set provides a flexible mathematical framework for handling uncertainty by incorporating three distinct membership functions truth indeterminacy and falsity 50 In response to the growing complexity of real world problems advanced extensions such as the Hyperneutrosophic Set and the Superhyperneutrosophic Set have been introduced These extensions offer a higher dimensional approach to modeling uncertainty and can be formally defined in 33 34 35 37 36 51 32 Since the Hyperneutrosophic Set and the SuperHyperneutrosophic Set have only been recently defined there remains a lack of concrete examples demonstrating their applicability This paper aims to bridge this gap by exploring practical examples of these concepts in the field of agriculture Additionally we introduce two novel extensions the Forest Hyperneutrosophic Set and the Forest SuperHyperneutrosophic Set which further generalize the existing models to accommodate hierarchical and interconnected uncertainty structures in complex systems Some Types of HyperNeutrosophic Set (4): Cubic, Trapezoidal, q-Rung Orthopair, Overset, Underset, and Offset Takaaki Fujita, Florentin Smarandache , This paper builds upon the foundational work presented in 38 40 The Neutrosophic Set provides a comprehensive mathematical framework for managing uncertainty defined by three membership functions truth indeterminacy and falsity Recent advancements have introduced extensions such as the Hyperneutrosophic Set and the SuperHyperneutrosophic Set which are specifically designed to address increasingly complex and multidimensional problems The formal definitions of these sets are available in 30 In this paper we extend the Neutrosophic Cubic Set Trapezoidal Neutrosophic Set q Rung Orthopair Neutrosophic Set Neutrosophic Overset Neutrosophic Underset and Neutrosophic Offset using the frameworks of the Hyperneutrosophic Set and the SuperHyperneutrosophic Set Furthermore we briefly examine their properties and potential applications Arctic: New Political Economy Alexander Bezgodov, 2023-11-15 Alexander Bezgodov a well known researcher of macroeconomics and social issues is devoted to the Arctic one sixth of the planet s surface which for many has remained an afterthought But in recent years the Arctic has changed dramatically with the global transformation of the climate turning deserted ice expanses into fairly safe land hospitable for a short time In two or three decades it may become comfortable With property in the Arctic having yet to be formalized the stakes are high World powers

located thousands of miles from the Arctic Ocean are claiming their rights to a share of the common heritage of humanity In this book the author provides a comprehensive analysis of how economically successful states have sought to develop the planet's resources in the neutral spaces of the Arctic Ocean Other topics include the history of polar expeditions and discoveries the start of permafrost territories by pioneers the cultivation of relations with indigenous peoples the evolution of international Arctic law and the developing map of territorial and neutral waters Arctic highlights the stakes and why there will be plenty to argue about while also proposing solutions that could prevent a crisis

**Nuclear Power** Darryl Siemer, 2019-09-20 As the world's energy sources continue to develop with less reliance on traditional fossil fuels and more reliance on cleaner more efficient alternative energy sources nuclear power continues to be a dividing point for many people Some believe it is the answer to our energy problems for the future while others warn of the risks Written by a retired scientist who spent most of his career at the Idaho National Laboratory INL this book aims to delve into the issues surrounding nuclear power and dispel its myths while building an argument for why the United States should develop a nuclear power plan for the future As a whistleblower the author spent much of the last ten years of his career at the INL raising concerns about how its mission of serving as the Department of Energy's lead

laboratory in radioactive waste management was not being properly managed While the United States continues to tread water on the issue of nuclear energy the author believes that a nuclear renaissance is not only possible but is necessary for meeting the world's growing demand for energy especially clean energy With fossil fuels slowly dying out and renewable energy sources not able to handle the demand for a continuously growing energy consuming public nuclear is an obvious solution This book is a must have for any engineer working in nuclear power students hoping to go into that industry and other engineers and scientists interested in the subject This book is both technical and political because they're equally important in determining what actually happens in institutions dealing with technical problems
