

FINANCIAL ACCOUNTING

for MBAs

Easton • Wild • Halsey • McAnally

Authored by leading academics, *Financial Accounting for MBAs* prepares today's MBA students to be informed consumers of financial accounting data so that they can make the best business decisions possible.

KEY FEATURES

Written for the MBA student

Unlike other financial accounting textbooks, *Financial Accounting for MBAs* is expressly written for MBAs and is written by professors who teach financial accounting and analysis to MBAs.

Uses real company and industry data throughout, including assignments

Financial Accounting for MBAs draws on real company and industry data throughout, including the assignments. Excerpts from annual reports and footnotes are used generously, as are company comparisons both within and across industries.

Examines accounting from an analysis and decision-making perspective

This textbook examines accounting from an analysis and decision usefulness perspective because today's MBAs must understand, analyze, and interpret financial reports for business decisions.

Limits accounting mechanics

Financial Accounting for MBAs presents the accounting techniques that a business manager must know to succeed in business, and it avoids the detailed mechanics that a CPA must know.

Presents materials as independent modules for teaching flexibility

The book is divided into twelve independent modules. Individual modules can be skipped or rearranged without disrupting the learning process.
