[Hands-On Music Generation with Magenta](#) Alexandre DuBreuil,2020-01-31 Design and use machine learning models for music generation using Magenta and make them interact with existing music creation tools Key FeaturesLearn how machine learning deep learning and reinforcement learning are used in music generationGenerate new content by manipulating the source data using Magenta utilities and train machine learning models with itExplore various Magenta projects such as Magenta Studio MusicVAE and NSynthBook Description The importance of machine learning ML in art is growing at a rapid pace due to recent advancements in the field and Magenta is at the forefront of this innovation With this book you'll follow a hands on approach to using ML models for music generation learning how to integrate them into an existing music production workflow Complete with practical examples and explanations of the theoretical background required to understand the underlying technologies this book is the perfect starting point to begin exploring music generation The book will help you learn how to use the models in Magenta for generating percussion sequences monophonic and polyphonic melodies in MIDI and instrument sounds in raw audio Through practical examples and in depth explanations you'll understand ML models such as RNNs VAEs and GANs Using this knowledge you'll create and train your own models for advanced music generation use

cases along with preparing new datasets Finally you ll get to grips with integrating Magenta with other technologies such as digital audio workstations DAWs and using Magenta.js to distribute music generation apps in the browser By the end of this book you ll be well versed with Magenta and have developed the skills you need to use ML models for music generation in your own style What you will learn

- Use RNN models in Magenta to generate MIDI percussion and monophonic and polyphonic sequences
- Use WaveNet and GAN models to generate instrument notes in the form of raw audio
- Employ Variational Autoencoder models like MusicVAE and GrooVAE to sample interpolate and humanize existing sequences
- Prepare and create your dataset on specific styles and instruments
- Train your network on your personal datasets and fix problems when training networks
- Apply MIDI to synchronize Magenta with existing music production tools like DAWs

Who this book is for This book is for technically inclined artists and musically inclined computer scientists Readers who want to get hands on with building generative music applications that use deep learning will also find this book useful Although prior musical or technical competence is not required basic knowledge of the Python programming language is assumed
