Formwork for Concrete Mary Krumboltz Hurd, 2005 Formwork for Concrete has been written to serve a broad range of needs for information on formwork For the experience designer or builder of formwork it is a ready reference on material properties design data and construction suggestions For the engineer architect it adds guidance in relating details of the structure's design to the problems and possibilities of executing them in concrete For the novice the book provides an introduction to many common formwork practices explaining basic design principles and encouraging a rational rather than rule of thumb approach to formwork book jacket

Capture and Reuse of Project Knowledge in Construction Hai Chen Tan, Chimay J. Anumba, Patricia M. Carrillo, Dino Bouchlaghem, John Kamara, Chika Udeaja, 2010-02-01 Capture and Reuse of Project Knowledge in Construction An organisation's competitive advantage lies in the knowledge of its employees and the organisation's ability to harness that knowledge to meet business objectives Knowledge management is recognised in the construction industry as a potential tool for providing organisational benefits but for a number of reasons particularly the project based nature of construction where teams are transient multidisciplinary and often from different organisations implementation has been only marginally successful Capture and Reuse of Project Knowledge in Construction describes a methodology for the live capture of reusable project knowledge that reflects both the organisational and human dimensions of knowledge capture and reuse as well as exploiting the benefits of technology This methodology was developed in response to the shortcomings of current practices in managing project knowledge the benefits offered by capturing and sharing knowledge immediately after it is generated and the organisational benefit of reusing knowledge within a project based environment Written for all practitioners in project based industries who have struggled with the capture and reuse of knowledge on their projects it will also be of interest to students and researchers in construction management and allied disciplines

fib Fédération internationale du béton, 2009-01-01 The realization process of civil engineering structures is complicated involving a wide variety of disciplines each of which brings a specific contribution It is a challenge to structure the process so that a balanced optimized participation of the many disciplines involved is achieved One of the critical success factors is knowledge management each discipline should bring professional knowledge but they should interact at interfaces as well Temporary structures are an example of this phenomenon they are right in the middle of a complex system of interactions between structural engineering site engineering work preparation procurement and execution They have a significant impact on cost construction time construction methodology and the through life performance of the actual structure Formwork and falsework are among the most important elements of temporary structures for civil engineering projects Knowledge management with respect to formwork and falsework requires engineers to share knowledge and experience in the broadest sense as the actual performance of formwork and falsework can only be evaluated at a late stage in the realization process when some disciplines are no longer present The learning circle can therefore only be closed through feedback fib Bulletin 48 presents an overview of formwork and falsework techniques and addresses issues related to the design and application thereof Its objective is to bridge the gap often experienced in practice by effectively feeding back state of the art knowledge and experience with regard to formwork and falsework thus making a larger group of engineers familiar with the important issues related to the design and application of formwork and falsework It aims to provide both structural and site engineers with information to design and use formwork and falsework in a safe reliable and economic way thus achieving better interaction between the engineering disciplines involved Bulletin 48 addresses some fundamental issues related to formwork and falsework The appearance of the finished concrete which is closely related to the quality of the formwork The performance of the finished concrete in relation to durability and as part of Life Cycle Management The need to support the concrete while it acquires enough strength and stiffness to support itself In this context the most important issue is structural safety The guidelines given in this document are based on the experience of site and design engineers and most of the advice is a consequence of real problems experienced in the past Any warnings based solely on theoretical judgment have been avoided only recommendations based on experience have been included fib Bulletin 48 focuses on principles only and therefore does not address detailed design issues for which local design codes should be applied **Formwork**, 2012

BRE Digest, 2001 *RIBA Journal*, 2008-07 **Architectural Detailing** Edward Allen, Patrick Rand, 2016-02-24 The industry standard guide to designing well performing buildings Architectural Detailing systematically describes the principles by which good architectural details are designed Principles are explained in brief and backed by extensive illustrations that show you how to design details that will not leak water or air will control the flow of heat and water vapor will adjust to all kinds of movement and will be easy to construct This new third edition has been updated to conform to

International Building Code 2012 and incorporates current knowledge about new material and construction technology Sustainable design issues are integrated where relevant and the discussion includes reviews of recent built works that extract underlying principles that can be the basis for new patterns or the alteration and addition to existing patterns Regulatory topics are primarily focused on the US but touch on other jurisdictions and geographic settings to give you a well rounded perspective of the art and science of architectural detailing In guiding a design from idea to reality architects design a set of details that show how a structure will be put together Good details are correct complete and provide accurate information to a wide variety of users By demonstrating the use of detail patterns this book teaches you how to design a building that will perform as well as you intend Integrate appropriate detailing into your designs Learn the latest in materials assemblies and construction methods Incorporate sustainable design principles and current building codes Design buildings that perform well age gracefully and look great Architects understand that aesthetics are only a small fraction of good design and that stability and functionality require a deep understanding of how things come together Architectural Detailing helps you bring it all together with a well fleshed out design that communicates accurately at all levels of the construction process
