The Use and Abuse of Stories Hanna Meretoja, Mark Freeman, 2023 We live in a world that is increasingly defined by a contest of incommensurable narratives This situation has emerged over a period of time shaped by the rise of populism the increasing polarization of societies what has been dubbed as post truth politics and most recently Russia's war in Ukraine The internet is replete with narratives that contest basic facts about climate change the Covid 19 pandemic and the atrocities that Russia is currently committing in Ukraine *Vampires Today* Joseph P. Laycock, 2009-05-14 This book about real vampires and the communities they have formed explores the modern world of vampirism in all its amazing variety Long before Dracula people were fascinated by vampires The interest has continued in more recent times with Anne Rice's Lestat novels Buffy the Vampire Slayer the HBO series True Blood and the immensely popular Twilight But vampires are not just the stuff of folklore and fiction Based upon extensive interviews with members of the Atlanta Vampire Alliance and others within vampire communities throughout the United States this fascinating book looks at the details of real vampire life and the many expressions of vampirism as it now exists In *Vampires Today The Truth about Modern Vampirism* Joseph Laycock argues that today's vampires are best understood as an identity group and that vampirism has caused a profound change in how individuals choose to define themselves As vampires come out of the coffin as followers of a religion or lifestyle or as people biologically distinct from other humans their confrontation with mainstream society will raise questions as it does here about how we define normal and what it means to be human **Principles of International Environmental Law**

Shigemura, Rethy Kieth Chhem, 2015-11-25 This book focuses on mental health issues arising in the wake of the Fukushima nuclear disaster Three years after the 11 March 2011 Great East Japan Earthquake tsunamis and Fukushima Daiichi nuclear accident roughly 130 000 individuals continue to face enormous burdens as a result of mandatory evacuation Many evacuees still live in temporary housing and returning home remains a distant dream as they wait for the decontamination of the

danger zone to be completed However the plant recovery process is still evolving and the complete cleanup will take decades Beyond all of these hardships many evacuees are also mourning the loss of their loved ones The compound disaster with its many uncertainties poses and will continue to pose serious emotional and social challenges People affected by the nuclear disaster have been facing serious psychological challenges from ongoing fear of radiation exposure Furthermore there is continuing debate between various stakeholders on the options for disaster responses This situation in turn produces adverse public responses such as discrimination and stigmatization of the evacuees and scapegoating of the authorities and nuclear plant workers Mental Health and Social Issues Following a Nuclear Accident addresses these issues and their impacts pursuing both evidence based and narrative based approaches It also contrasts the Fukushima findings with those of other nuclear disasters namely Three Mile Island and Chernobyl
