Andreas Öchsner, Holm Altenbach, 2023-07-27 This book gives an update on recent developments in different engineering disciplines such as mechanical materials computer and process engineering focusing on modern engineering design applications These disciplines provide the foundation for the design and development of improved structures materials and processes The modern design cycle is characterized by an interaction of different disciplines and a strong shift to computer based approaches where only a few experiments are performed for verification purposes A major driver for this development is the increased demand for cost reduction which is also connected to environmental demands In the transportation industry e g automotive this is connected to the demand for higher fuel efficiency which is related to the operational costs and the lower harm for the environment One way to fulfill such requirements is lighter structures and or improved processes for energy conversion Another emerging area is the interaction of classical engineering with the health medical and environmental sector The chapters are selected contributions of the Advanced Computational Engineering and Experimenting conference held in July 2022 in Florence Italy **Inspection of Medical Devices** Almir Badnjević, Mario Cifrek, Ratko Magjarević, Zijad Džemić, 2017-10-26 This book offers all countries a guide to implementing verification systems for medical devices to ensure they satisfy their regulations It describes the processes procedures and need for integrating medical devices into the legal metrology framework addresses their independent safety and performance verification and highlights the associated savings for national healthcare systems all with the ultimate goal of increasing the efficacy and reliability of patient diagnoses and treatment The book primarily focuses on diagnostic and therapeutic medical devices and reflects the latest international directives and regulations Above all the book demonstrates that integrating medical devices into the legal metrology system and establishing a fully operational national laboratory for the inspection of medical devices could significantly improve the reliability of medical devices in diagnosis and patient care while also reducing costs for the healthcare system in the respective country Design, User Experience, and Usability: Web, Mobile, and Product Design
Aaron Marcus, 2013-07-03 The four volume set LNCS 8012 8013 8014 and 8015 constitutes the proceedings of the Second International Conference on Design User Experience and Usability DUXU 2013 held as part of the 15th International Conference on Human Computer Interaction HCII 2013 held in Las Vegas USA in July 2013 jointly with 12 other thematically similar conferences The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The total of 282 contributions included in the DUXU proceedings were carefully reviewed and selected for
