Principles of Data Management and Presentation

Dr. John P. Hoffmann,2017-07-03 The world is saturated with data We are regularly presented with data in words tables and graphics Students from many academic fields are now expected to be educated about data in one form or another Yet the typical sequence of courses introductory statistics and research methods does not provide sufficient information about how to focus in on a research question how to access data and work with datasets or how to present data to various audiences Principles of Data Management and Presentation addresses this gap Assuming only that students have some familiarity with basic statistics and research methods it provides a comprehensive set of principles for understanding and using data as part of a research project including how to narrow a research topic to a specific research question how to access and organize data that are useful for answering a research question how to use software such as Stata SPSS and SAS to manage data how to present data so that they convey a clear and effective message A companion website includes material to enhance the learning experience specifically statistical software code and the datasets used in the examples in text format as well as Stata SPSS and SAS formats Visit www.ucpress.edu/go/datamanagement Downloads tab
