Transforming University Biochemistry Teaching Using Collaborative Learning and Technology Penny J. Gilmer, 2010-03-10 One aim of Gilmer's captivating text on university pedagogy is to show that biochemistry or any science does not consist solely of facts to be learned but is a way of thinking about the world Her purpose both in this book and in her classroom is to make her students into critical thinkers rather than passive learners The chapters cast a critical eye over research into enhanced education techniques such as collaborative learning Gilmer describes the action research she conducted in her own biochemistry undergraduate classroom into ways of improving the learning environment She offers various perspectives on the make up of her classroom including an analysis of ethnographic data The tools Gilmer employs as she hones her teaching skills include collaborative learning and technology She views the classroom through various theoretical perspectives social constructivism cultural historical activity theory and a theory that involves the dialectic between the structure of the learning environment and the agency of the learners a group among whom she includes herself She provides a wealth of autobiographical detail as well as the results of her action research which followed up on its original subjects after an interval of 11 years to see what impact her course had on their professional growth Above all this volume is proof of what can be achieved in education when teachers are as interested in the process of learning as they are in their subject itself **Software Reviews on File**, 1989 *Research in Education*, 1971 [Resources in Education](#), 1976
