**The Rise of Trump** Matthew C MacWilliams, 2016-09-28 The ascendance of Donald Trump to the presidential candidacy of the Republican Party has been both remarkable and to most commentators unlikely In The Rise of Trump America's

Authoritarian Spring Matthew MacWilliams argues that Trump's rapid rise through a bewildered Republican Party hierarchy is no anomaly rather MacWilliams argues it is the most recent expression of a long standing theme in American political life the tendency and temptation to an ascriptive politics a political view that builds its basic case on ascribing to any relatively disempowered group whether defined by race ethnicity gender sexual orientation religious belief or other identifying category a certain set of qualities that justify discriminatory treatment The ascriptive tradition in American politics though longstanding has generally been kept to a relatively small minority a minority whose rights perhaps paradoxically have been protected by the principles of Madisonian democracy even though central to its worldview is the need and urgency of limiting the rights of some It has found champions in years past in such figures as Andrew Jackson Huey Long Joseph McCarthy and Pat Buchanan But in Donald Trump this tradition has found a significant new voice one emboldened by deeper shifts in the American political landscape Trump's swift and unsettling rise to the pinnacle of presidential politics may point toward the emergence of more significant and substantial questions about the future course of a democratic government committed to principles of equality and the freedom of expression association and conscience

**Integrative Approaches to Psychology and Christianity, Fourth Edition** David N. Entwistle, 2021-11-03 Since the first edition of Integrative Approaches to Psychology and Christianity was published in 2004 this has become the standard textbook on the topic Now in its fully revised fourth edition Dr Entwistle's book elucidates historical philosophical and practical issues in the integration of psychology and Christianity As in previous editions the current text provides an introduction to many of the worldview issues and philosophical foundations that frame the relationship of psychology and theology includes scholarly reflection on the integration literature and surveys six models of possible relationships between psychology and Christianity ranging from those that are completely opposed to either religion or psychology to intermediate models that assert that some limited interaction between them is possible to viewpoints which suggest that a Christian worldview approach can be used to provide a context for exploring areas of overlapping interest between psychology and Christianity The current edition considers recent advances in both Catholic and Protestant thinking on integration including contemporary questions about what evangelicalism is and is not that shape evangelical reactions to the integration debate New content ranges from information about the contrasting views of Tertullian and Augustine to insights from contemporary psychology about factors that adversely affect the quality and reliability of human thinking to how conflict over COVID 19 has entered contemporary religious debate The book is designed to help readers become aware of the presuppositional backdrops that each of us brings to these issues Questions at the end of each chapter are included to help readers evaluate both the material and their own burgeoning approach to integration This book is ideal as a textbook for students of psychology and other behavioral and social sciences social work sociology theology counseling pastoral counseling at both the graduate and undergraduate level It is also written for the broader readership of psychologists counselors pastors and others who are interested in integration
