been a traditional epistemological stance related to antirealist construals of laws and theories such as instrumentalism and inferentialism. By contrast the more recent fictional view of models holds that scientific models must be conceived of as the same kind of entities as literary characters and places. This approach is essentially an answer to the ontological question concerning the nature of models which in principle is not incompatible with a representationalist account of the function of models. The artifactual view of models is an approach according to which scientific models are epistemic artifacts whose main function is not to represent the phenomena but rather to provide epistemic access to them. It can be conceived of as a non-representationalist and pragmatic account of modeling which does not intend to focus on the ontology of models but rather on the ways they are built and used for different purposes. The different essays address questions such as the artifactual view of idealization, the use of information theory to elucidate the concepts of abstraction and idealization, the deidealization of models, the nature of scientific fictions, the structural account of representation and the ontological status of structures, the role of surrogate reasoning with models and the use of models for explaining and predicting physical phenomena. 2000

Fer amena la lectura i l'estudi d'una ciència no s'asfalta i encara menys si es tracta de la toxicologia dels tòxics en principi res de bo en cal esperar quan els éssers humans i altres animals ens hi exposen accidentalment o intencionadament. D'aquí el mèrit d'aquest llibre que de manera pausada i racional va introduint conceptes toxicològics essencials complementant los convenientment amb l'anàlisi minuciosa i gens morbosa de les denominades catàstrofes tòxiques. Si en el primer volum d'aquesta sèrie es van abordar temes importants com el rad i el desastre de la talidomida, l'afer de la colza o el cas de Minamata i el metilmercuri, el present no talla curt. El lector hi trobarà per exemple els antídots i la seva peculiar història, el que són les mutacions i els cançons les dioxines i l'accident de Seveso o com es calcula si amb una cervesa ja n'hi ha prou per donar positiu al volant en un test d'alcoholèmia. Encara més dos temes ambientals són tractats amb profunditat i científicament les marees negres i la perpètua polèmica sobre els de perdigons de plom en esports com la caça i el tir. El doctor Raimon Guitart, Barcelona 1959, cap de la Unitat de Toxicologia del Departament de Farmacologia de Terapèutica i de Toxicologia de la Universitat Autònoma de Barcelona, on ensenya aquesta matèria a les llicenciatures de Veterinària de Ciència i Tecnologia dels Aliments i de Ciències Ambientals. Autor de més de cent articles científics i de divulgació, del punt de vista investigador centra els seus esforços en la problemàtica de la contaminació d'animals i d'aliments. Als anys noranta va tenir un paper destacat en la promulgació de la llei estatal que prohibeix els de perdigons de plom en zones humides. **Materiales de ciencias de la naturaleza para la ESO**, 1993

*historias ilustradas con experimentos de química y de física* Josep Corominas Viñas, 2025-04-01 En este libro se encuentran una serie de relatos mitológicos de antiguas leyendas de Europa, el lejano oriente, América y África, así como historias de acontecimientos generalmente inverosímiles descritos en libros y películas. Cada relato va seguido de uno o a veces varios experimentos más o menos acordes con el texto. Aunque también se puede considerar como un libro de experimentos de física y química. Cada experimento acompañado de un contexto extraído de la mitología o de leyendas viejas o modernas.
