*Rang & Dale's Pharmacology E-Book* James M. Ritter, Rod J.

Flower, Graeme Henderson, Yoon Kong Loke, David MacEwan, Emma Robinson, James Fullerton, 2023-05-13 Rang and Dale's Pharmacology is internationally acknowledged as the core textbook for students of pharmacology and has provided accessible up to date information on drugs and their mechanism of action for more than 30 years. Now in its tenth edition it has been updated to include important new drugs such as gene therapies, personalised medicines and the new wave of RNA drugs. However, it has not lost any of the elements that have contributed to its popularity such as color coding and illustrations, making it reader friendly while comprehensively covering the depth of detail required. This essential book is recommended as the first choice undergraduate text for science and medical students and junior doctors and will also be useful for students in other professional disciplines such as pharmacy, veterinary medicine and nursing. Comprehensive information on drug mechanisms, basic physiology and biochemistry and underlying pathophysiology of disease suitable for students from many disciplines. Clear figures to aid understanding including data figures as well as mechanistic diagrams. Key points, box summaries, clinical boxes and colour coded chapters help to master difficult concepts. Emphasis on therapeutic drugs to help apply theory to practice. Over 150 questions and 12 clinical cases to test your knowledge. An enhanced eBook version is included with purchase. The eBook allows you to access all the text, figures and references with the ability to search, customise your content, make notes and highlights and have content read aloud. New chapters on drugs and the eye and the pharmacological management of headache. Revised information on biopharmaceuticals including RNA drugs, antivirals including Covid 19 therapies as well as general principles of antimicrobial therapy. A completely revised and updated chapter on lifestyle drugs. Recent advances in oxygen sensing and response to reduced oxygen tension. Expanded chapters on dementia and analgesic drugs.

between drugs and CAM therapies Improved internal design for ease of navigation      *Pharmacological Basis of Acute Care* Yoo Kuen Chan, Kwee Peng Ng, Debra Si Mui Sim, 2014-11-19 This book is the 4th in a series of Acute Care books written with the aim to address the NEEDS of health care providers when handling the acutely ill patients Globally it has become apparent that the study of pharmacology and subsequent clinical training has not always adequately equipped young doctors with the ability to administer drugs to their patients safely and confidently particularly in the critically ill patient Compounding this issue is the lack of resource material related to these pharmacological concepts contained in one book that can help health care providers to understand and manage drug therapy in the acute situation In spite of progressively newer and more developed protocols guidelines algorithms and many other books addressing the technical aspects of what needs to be done most health care providers still find it difficult to grasp the basic pharmacological knowledge and rationally deliver the CARE that is required in the acute phase of patient management The editors authors have therefore aimed for a book that highlights topics and pharmacological issues pertinent to management of patients in their hour of need This is a multi author book but the style has been guided by 3 editors The editors have used a different perspective that of normalizing abnormal physiological processes with pharmacological agents to address the GAPS in a bedside to bench approach The details are pared down but important principles concepts are emphasized      **Rang & Dale's Pharmacology** James M. Ritter, Rod J. Flower, Graeme Henderson, Yoon Kong Loke, David MacEwan, Humphrey P.
