Relationship between Forest Ecophysiology and

Environment Roberto Tognetti, John D. Marshall, 2021-06-04 Ecophysiological mechanisms underlie plant responses to environmental conditions and the influence these responses have on ecological patterns and processes In this Special Issue with a particular interest in the interactions between climate change environmental disturbance and functional ecology experimental observations are described at a range of spatial scales A modeling framework is used in an effort to relate mechanistic responses to ecosystem functions and services and link forest ecophysiology and environmental indicators This Special Issue collects important advances in studying and monitoring plant environment interactions covering biogeographic gradients from Mediterranean woodlands to boreal forests and from Alpine mountains to tropical environments

Stochastic Hydraulics 2000 Zhao-Yin Wang, Shi-Xiong Hu, 2020-12-17 The applications of stochastic methods in design by reliability include the better utilisation of hydrological information With statistical methods one can evaluate the safety component of hydraulic systems Based on these extra safety features can be added to ensure the reliable performance of an hydraulic system One such example is the design of a dam which features a number of random variables each with a very distinct and quite different probability function This book reports on developments in stochastic hydraulics across a wide range of applications including river hydraulics sediment transportation waves and coastal processes hydrology hydraulic works and structure and environmental hydraulics
