*Der Glaube eines Glaubensunwilligen* Michael Murauer, 2025-07-11 Wider alle dogmatischen Weltanschauungen Wie kann eine philosophische Lebensorientierung in unserer Zeit aussehen Warum sollten wir sie religiös geprägten Lebensentwürfen vorziehen Die Zukunft gehört der Philosophie nicht den Religionen oder sektularen Ideologien Mit dieser grundlegenden Aussage stellt sich Michael Murauer in die Tradition des aufklärerischen Denkens Der Philosoph und Mediziner der keine

akzeptable Alternative zu einer rationalen Debatte weltanschaulicher und moralischer Fragen sieht ist sich bewußt da am Ende einer solchen Auseinandersetzung keine absoluten Wahrheiten sondern gut begründbare Wertentscheidungen stehen wie sie hier thematisch breitgefächert vorgestellt werden Der Glaube eines Glaubensunwilligen balanciert ständig auf dem Grat zwischen systematischer philosophischer Abhandlung und persönlichem Bekenntnis und mißt sich dabei am aktuellen Stand des Denkens Dieses Buch versucht die philosophische Weltanschauungskritik unter Berücksichtigung des durch die moderne Wissenschaft erarbeiteten Weltbilds zusammenfassend wiederzugeben gleichzeitig aber auch Orientierung und Lebenshilfe auf der Grundlage eines zeitgemäßen philosophischen Denkens anzubieten Für die 3. *The Cognitive Science of Religion* James A. Van Slyke, 2016-03-23 The cognitive science of religion is a relatively new academic field in the study of the origins and causes of religious belief and behaviour The focal point of empirical research is the role of basic human cognitive functions in the formation and transmission of religious beliefs However many theologians and religious scholars are concerned that this perspective will reduce and replace explanations based in religious traditions beliefs and values This book attempts to bridge the reductionist divide between science and religion through examination and critique of different aspects of the cognitive science of religion and offers a conciliatory approach that investigates the multiple causal factors involved in the emergence of religion

**Der Koran und die Genealogie des Islam** Reinhard Schulze, 2015-04-01 Lange war man im Westen davon berzeugt gewesen dass zwischen Religion Gesellschaft und Staat in der Epoche der europ ischen Aufkl rung ein Einverst ndnis gefunden worden ist Diese Sicherheit ist in den vergangenen Jahrzehnten ins Wanken geraten Im Namen des Islam werden Terroranschl ge ver bt und Kriege gef hrt Von vielen Menschen wird der Islam als eine Religion wahrgenommen die

nicht zwischen Religion und Zivilgesellschaft unterscheidet und den Friedenszustand gefährdet. Doch gibt es überhaupt den Islam oder den Koran? Der Islam wird oft in einer problematischen Vereinfachung auf den Koran und den Propheten Muhammad reduziert. Daraus wird dann der Kurzschluss gezogen, der Islam lasse sich aus diesem Ursprung heraus definieren. Gegen dieses ahistorische Ursprungsdenken und die damit einhergehenden Stereotypen zu dem Islam und dem Koran bringt Reinhard Schulze die Geschichte in Anschlag. Er verfolgt in seiner gelehrten und analytisch präzisen Studie die Geschichte der Entstehung der Schrift Koran, bei deren sprachliche Verfasstheit das Arabische und Intertexte betrachtet die Offenbarung an Muhammad aus historischer Perspektive und reflektiert nicht zuletzt bei den Voraussetzungen und unhinterfragten Prämissen des wissenschaftlichen Diskurses über den Islam so etwa im Orientalismus des 19. Jahrhunderts in der Rede von der Religion als anthropologischer Konstante oder neurobiologischer Programmierung.

**Marketing Metaphoria** Gerald Zaltman, Lindsay H. Zaltman, 2008. Marketing Metaphoria undresses the mind of the consumer to reveal the powerful unconscious viewing lenses that shape what people think, hear, say and do. These lenses are called deep metaphors and they populate the unconscious mind. Understanding how people use deep metaphors will help you develop new products, launch innovations, enhance purchase and consumption experiences, create engaging communications and much more. Drawing on thousands of interviews, the authors identify seven primary deep metaphors. Knowing how they influence your consumers can have a huge effect on your sales and profits. Marketing Metaphoria describes how some of the world's most famous companies as well as small firms, not for profits and social enterprises have successfully leveraged deep metaphors to solve their marketing problems. **Reason and Religion** Herman Philipse, 2022-04-28. Combines philosophical investigations concerning the truth of religious convictions with empirical research on the origins and functions of religious beliefs. This book focuses on two core questions: 1. How probable is it that any particular god exists? 2. How should we account for the occurrence of religious beliefs in human societies?

**Neurotheology** Andrew Newberg, 2018-03-27. Religion is often cast in opposition to science. Yet both are deeply rooted in the inner workings of the human brain. With the advent of the modern cognitive neurosciences, the scientific study of religious and spiritual phenomena has become far more sophisticated and wide-ranging. What might brain scans of people in prayer, in meditation or under the influence of psychoactive substances teach us about religious and spiritual beliefs? Are religion and spirituality reducible to neurological processes or might there be aspects that at least for now transcend scientific claims? In this book, Andrew Newberg explores the latest findings of neurotheology, the multidisciplinary field linking neuroscience with religious and spiritual phenomena. He investigates some of the most controversial and potentially transformative implications of a neurotheological approach for the truth claims of religion and our understanding of minds and brains. Newberg leads readers on a tour through key intersections of neuroscience and theology, including the potential evolutionary basis of religion, the psychology of religion, including mental health and brain pathology, the neuroscience of myths, rituals and mystical experiences, how studies of

altered states of consciousness shed new light on the mind brain relationship and what neurotheology can tell us about free will When brain science and religious experience are considered together in an integrated approach Newberg shows we might come closer to a fuller understanding of the deepest questions      *The Evolution of Rationality* F. LeRon Shults, 2006-11-09 How can science and religion move together toward a collegial future J Wentzel van Huyssteen has spent decades developing an interdisciplinary platform for the fruitful engagement of science and religion Compiled to celebrate van Huyssteen's 65th birthday *The Evolution of Rationality* gathers a stellar roster of scholars in van Huyssteen's main areas of philosophy science and theology The contributors some of them Gifford lecturers and Templeton Prize winners offer significant new methodological and material proposals giving evidence of van Huyssteen's impact on the shape and texture of interdisciplinary conversation itself Their essays are arranged in three parts modern and postmodern philosophical challenges to our understanding of rationality scientific evolutionary perspectives on the nature and development of human rationality in relation to religion religious and theological explorations of the evolution of rationality However because the authors are all involved in interdisciplinary dialogue this philosophical scientific theological arrangement of chapters is not hard and fast Virtually every essay engages issues that overlap all three fields forming an extremely rich blend of thought A creative interdisciplinary collection written by world renowned philosophers scientists and theologians *The Evolution of Rationality* renders fitting tribute to pioneering scholar mentor J Wentzel van Huyssteen Contributors John Hedley Brooke Delwin Brown Philip Clayton Jean Clottes F W Dobbs Allsopp David Fergusson Niels Henrik Gregersen David Lewis Williams George Newlands Richard Robert Osmer Arthur Peacocke Kenneth A Reynhout Holmes Rolston III Michael Ruse Calvin O Schrag F LeRon Shults Christopher Southgate Michael L Spezio Mikael Stenmark Jerome A Stone Ian Tattersall Roger Trigg Keith Ward Wesley J Wildman      **Invented Religions** Carole M. Cusack, 2016-05-06 Utilizing contemporary scholarship on secularization individualism and consumer capitalism this book explores religious movements founded in the West which are intentionally fictional Discordianism the Church of All Worlds the Church of the SubGenius and Jediism Their continued appeal and success principally in America but gaining wider audience through the 1980s and 1990s is chiefly as a result of underground publishing and the internet This book deals with immensely popular subject matter Jediism developed from George Lucas Star Wars films the Church of the Flying Spaghetti Monster founded by 26 year old student Bobby Henderson in 2005 as a protest against the teaching of Intelligent Design in schools Discordianism and the Church of the SubGenius which retain strong followings and participation rates among college students The Church of All Worlds focus on Gaia theology and environmental issues makes it a popular focus of attention The continued success of these groups of Invented Religions provide a unique opportunity to explore the nature of late post modern religious forms including the use of fiction as part of a bricolage for spirituality identity formation and personal orientation      **The Mark of the Sacred** Jean-Pierre Dupuy, 2023-05-25 This study of religion and violence forces us to reexamine some of our most cherished self images of

modern liberal democratic societies Charles Taylor Jean Pierre Dupuy prophet of what he calls enlightened doomsaying has long warned that modern society is on a path to self destruction In this book he pleads for a subversion of this crisis from within arguing that it is our lopsided view of religion and reason that has set us on this course In denial of our sacred origins and hubristically convinced of the powers of human reason we cease to know our own limits our disenchanted world leaves us defenseless against a headlong rush into the abyss of global warming nuclear holocaust and the other catastrophes that loom on our horizon Reviving the religious anthropology of Max Weber Emile Durkheim and Marcel Mauss and in dialogue with the work of Ren Girard Dupuy shows that we must remember the world s sacredness in order to keep human violence in check A metaphysical and theological detective he tracks the sacred in the very fields where human reason considers itself most free from everything it judges irrational science technology economics political and strategic thought In making such claims The Mark of the Sacred takes on religion bashers secularists and fundamentalists at once Written by one of the deepest and most versatile thinkers of our time it militates for a world where reason is no longer an enemy of faith The Mark of the Sacred is one of those rare books which in an enlightened well organized state should be printed and freely distributed in all schools Slavoj i ek      **Radical Interpretation in Religion** Nancy Frankenberry,2002-09-19 Publisher Description
