Specialised Dictionaries for Learners Pedro A. Fuertes-Olivera, 2010-03-26 The need for constructing a lexicographical theory with a particular focus on specialised dictionaries for learners is well documented in recent publications This will imply paying attention to at least four basic lexicographic categories learners the learner's situation the learner's needs dictionary assistance In one or other way these categories are analysed in this book whose eleven chapters are grouped into three parts Part 1 reflects on some of the main ideas defended by the function theory of lexicography perhaps the theoretical framework that has paid more attention to specialised lexicography Part 2 presents some proposals that have already been explored in the field of general learner's dictionary and must be incorporated into specialised metalexicography cultural aspects figurative meaning the inclusion of grammatical information the use of corpora Part 3 introduces the state of play regarding specialised dictionaries in China and offers some ideas for coping with the proliferation of terminological glossaries in Internet The book also describes Enrique Alcaraz's academic achievements together with some personal anecdotes and a personal short tribute to his memory

Translating Cultures David Katan, 2014-06-03 As the 21st century gets into stride so does the call for a discipline combining culture and translation This second edition of Translating Cultures retains its original aim of putting some rigour and coherence into these fashionable words and lays the foundation for such a discipline This edition has not only been thoroughly revised but it has also been expanded In particular a new chapter has been added which focuses specifically on training translators for translational and intercultural competencies The core of the book provides a model for teaching culture to translators interpreters and other mediators It introduces the reader to current understanding about culture and aims to raise awareness of the fundamental role of culture in constructing perceiving and translating reality Culture is perceived throughout as a system for orienting experience and a basic presupposition is that the organization of experience is not reality but rather a simplified model and a distortion which varies from culture to culture Each culture acts as a frame within which external signs or reality are interpreted The approach is interdisciplinary taking ideas from contemporary translation theory anthropology Bateson's logical typing and metamessage theories Bandler and Grinder's NLP meta model theory and Hallidayan functional grammar Authentic texts and translations are offered to illustrate the various strategies that a cultural mediator can adopt in order to make the different cultural frames he or she is mediating between more explicit
