Competing Chinese and Foreign Firms in Swelling Chinese Economy Tetsuo Abo, 2010 In the rapid growth of the Chinese

economy as the world's factory and market while this process has been supported by foreign companies local Chinese companies have also emerged in the brief span of about 10 years to become major players This is an extremely rare case in the world history and recently even among the BRICs and the NIEs One cannot help but wonder what strategic positions foreign firms have adopted to cope with the extraordinary fierce challenges they have had to face from local Chinese firms A workshop discussed and illuminated the corporate activities and competitive and cooperative strategies of both Chinese and foreign firms from the perspective of Japanese European US and Asian firms

Engineering Asia Hiromi Mizuno, Aaron S. Moore, John DiMoia, 2018-08-09 Weaving together chapters on imperial Japan's wartime mobilization Asia's first wave of postwar decolonization and Cold War geopolitical conflict in the region Engineering Asia seeks to demonstrate how Asia's present prosperity did not arise from a so-called economic miracle but from the violent and dynamic events of the 20th century The book argues that what continued to operate throughout these tumultuous eras were engineering networks of technology Constructed at first for colonial development under Japan these networks transformed into channels of overseas development aid that constituted the Cold War system in Asia Through highlighting how these networks helped shape Asia's contemporary economic landscape Engineering Asia challenges dominant narratives in Western scholarship of an economic miracle in Japan and South Korea and the Asian Tigers of Southeast Asia Students and scholars of East Asian studies development studies postcolonialism Cold War studies and the history of technology and science will find this book immensely useful

South Korea at the Crossroads Scott A. Snyder, 2018-01-02 Against the backdrop of China's mounting influence and North Korea's growing nuclear capability and expanding missile arsenal South Korea faces a set of strategic choices that will shape its economic prospects and national security In South Korea at the Crossroads Scott A. Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions and a prescription for the future Pairing a historical perspective with a shrewd understanding of today's political landscape Snyder contends that South Korea's best strategy remains investing in a robust alliance with the United States Snyder begins with South Korea's effort in the 1960s to offset the risk of abandonment by the United States during the Vietnam War and the subsequent crisis in the alliance during the 1970s A series of shifts in South Korean foreign relations followed the Nordpolitik engagement with the Soviet Union and China at the end of the Cold War Kim Dae Jung's Sunshine Policy designed to bring North Korea into the international community trustpolitik which sought to foster diplomacy with North Korea and Japan and changes in South Korea's relationship with the United States Despite its rise as a leader in international financial development and climate change forums South Korea will likely still require the commitment of the United States to guarantee its security Although China is a tempting option Snyder argues that only the United States is both credible and capable in this role South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power and it must balance the contradiction of desirable autonomy and necessary alliance

Culture Shock for Asians in U.S. Academia

Eunkyong Lee Yook, 2013-11-26 Culture Shock for Asians in U S Academia Breaking the Model Minority Myth discusses the unique cultural challenges that Asians face in U S academia. The issues facing Asians in academia are worthy of our attention for two major reasons: the numerical significance of Asians in U S academia and the fact that their problem has been largely eclipsed due to their visible success and status as model minority. Asian immigrants are often called the model minority because of their Confucianist work ethic and emphasis on ye or social order as well as the high value placed on education. Additionally, Asians generally have often been stereotyped as excelling in academics. However, they face serious problems in adjusting to the U S academic system. These problems are due to cultural patterns and variables that are largely invisible yet nonetheless have an undeniable impact on academics. The issues that affect students ranging from kindergarten through graduate school and that also affect scholars in academic careers beyond the formative process are reviewed systematically in this book. Analysis of issues is based on intercultural communication theories and suggestions for overcoming these challenges are suggested. Becoming aware of and addressing the roadblocks for Asians is important not only for Asian students and scholars but also for educators, education administrators and institutions. Additionally, helping Asians to overcome the challenges in academia not only helps academia to become a more inclusive place where all students can learn and all scholars can work in academia successfully, it also benefits society by producing a more literate, educated and qualified workforce overall. By promoting understanding of this important topic in a systematic and theoretic fashion, valuable resources can be realized to their full potential.
