The Valayar of South India: Sex and divorce Erram Desingu Setty,1990 **Women's Rights and Bioethics** Lorraine Dennerstein,Margret M. Baltes,2000-01-01 Advances in the biomedical sciences have raised pertinent and often paradoxical questions concerning the relationship between women s health and their rights This book based on the Round Table on Bioethics and Women held at UNESCO during the Fourth Session of the International Bioethics Committee IBC presents the experience of field workers and actors in areas as diverse as health legal affairs governance education and psychology It takes into account both the various stages of the biological life span and the insertion of women in a particular socio economic and cultural context Although the book does not claim to be exhaustive it shows to what extent the specificity of issues related to women in relation to bioethical issues has sometimes been underestimated Based on numerous socio cultural experiences throughout the world it also provides a useful general view for readers who wish to pursue research or studies in this field UNESCO website **Gender Bias, Missing Girls and Population Imbalance** Sneha Sangwan,Randhir Singh Sangwan,Mahima,2015-01-01 Even in 21st century sex imbalance sex discrimination female foeticide and sexselective abortions continue unabated despite the efforts made by governments Union as well as State from time to time The book based on empirical research is intended to examine differentials in sex composition and to plead for balancing of population sex component with specific reference to the State of Haryana which always stood for adverse sex ratio indicating status of women in the society This volume raises the emotive issue of thousands of missing girls in a developed State of Haryana who fail to appear on the social scene even before their birth The girls are being aborted at a massive scale in recent decades simply for a strong desire to have a son This raises many questions Does the issue of son preference still dominate the scene in a patriarchal society despite the substantial progress in female literacy Does the gender bias still persists among the educated and betteroff sections of society Are the sex selective technologies helping the couples to achieve the desired family size and sex composition To answer these questions it is imperative to highlight the socio economic and cultural factors responsible for daughter discrimination and the resulting implications The present book very succinctly has intended to emphasize the importance of population sex balance in improvement of regional socio economic systems and to suggest strategies to achieve the same based on adequate comprehension of conceptual grasp and analytical discourse on socio economic and demographic characteristics of regional population perception and awareness among people issues and concerns of skewed child sex ratio **Women, Security, South Asia** Farah Faizal,Swarna Rajagopalan,2005-10-03 This book explores women s perspectives on matters of security and related policy focusing on women in South Asia who are battling society insecurity and violence in some form The book makes three important contributions First it examines existing theories of security Secondly it goes beyond critique and narrative to seek concrete new agendas for empirical research in security studies Finally it brings together statistical ethnographic and survey data **Who Breaks a Butterfly upon a**

Wheel? Harish S Guru, Priyadharshini V, Four boys break into a bank in the middle of the night with twelve hostages They call the police first and inform the press next An encounter specialist four bank robbers twelve hostages and a frenzy crowd hold the nation for one day as the brilliant heist plan spirals into a media circus for the whole nation to watch It s more than just a bank robbery Set in a quiet city in South India this story can happen to you Gender discriminations among young children in Asia Collectif, 2020-10-09 Subsequent to the demographic transition Asian countries have been experiencing deep rooted changes in family structures In this context the question of gender relations within the family and more generally within society is crucial in view of the increase in discriminatory practices toward women beginning at foetal conception and continuing through all stages of life Asia is the black continent for women Estimates place the deficit in the number of women in the world at between 60 and 100 million the vast majority of which is found on this continent This book focuses on the intensity of female discrimination from a demographic perspective in the earliest stages of life and more specifically around birth in China India Pakistan the Republic of Korea and Taiwan These societies share cultural characteristics that are not favourable to women patriarchal systems patrilineal families socialization processes encouraging the submission of wives to their husband s family etc In these societies a son is needed to perpetuate the family line and ensure social and biological reproduction of the family These are among the reasons why they share a strong son preference which is in some cases accentuated by economic constraints A son is generally the only person to support his parents in old age and as a rule help with work in the fields Moreover girls and women still occupy a marginal position in society whereas a male heir offers countless advantages Socio-economic Mobility and Low-status Minorities Jacob Meerman, 2009-06-02 This book concentrates on ethnic minorities such as former slaves outcasts and indigenous peoples dispossessed of homeland These groups are universally without power usually undereducated and always victims of their fellow citizens The book asks why these socially excluded groups remain at the bottom of their social hierarchies as the poorest of the poor even in nations long committed to equal opportunity Their slow progress has four causes obviously discrimination and poor education but also low economic growth and cultural heritage Low growth limits revenues for schools as well as new job opportunities and perpetuates traditional exploitative social relations and customs Traumatic histories of enslavement or conquest may induce behaviours by victims that reduce upward mobility Together these four interacting variables suggest a mobility model that explains the impasse The book develops and applies this model to interpret and compare the mobility history of five stigmatized low status ethnic groups U S African Americans Japan s Burakumin Afro Cubans India s Dalits Untouchables and Bolivia s Highland Indians The book also compares actions by governments and the groups themselves to overcome barriers to progress including job quotas boycotts mass protests and the unique kangaroo courts of Japan s Burakumin Meerman s unusual cross disciplinary approach and fascinating comparative studies of success and failure will appeal to scholars development practitioners and advocates working on issues of discrimination poverty equity and inequality in an ethnic
