CASE Oracle Corporation is a database software company that specializes in developing and marketing enterprise software products. The company was co-founded in 1977 by Larry Ellison, a Chicagoan with little formal training in databases but some practical experience working with the nonrelational databases of the period.

Through organic growth and a number of high-profile acquisitions, Oracle enlarged its share of the software market. In 2016 Oracle generated \$37 billion in revenue, about \$2 billion of that from SaaS and PaaS (Platform as a service), and \$29 billion from cloud and software sales. Oracle ranks second on the list of largest software companies in the world, after Microsoft. It has a market capitalization of \$198 billion in December 2017, placing it in the top 20 firms in the United States, just behind Coca Cola and JPMorgan Chase bank. Its main competitors in enterprise software today are SAP and IBM.
