Building 4.6/5.4L Ford Horsepower on the Dyno Richard Holdener, 2006 The 4.6 and 5.4 liter modular Ford engines

are finally catching up with the legendary 5.0L in terms of aftermarket support and performance parts availability. Having a lot of parts to choose from is great for the enthusiast but it can also make it harder to figure out what parts and modifications will work best. Building 465 4L Ford Horsepower on the Dyno takes the guesswork out of modification and parts selection by showing you the types of horsepower and torque gains expected by each modification. Author Richard Holdener uses over 340 photos and 185 back-to-back dyno graphs to show you which parts increase horsepower and torque and which parts don't deliver on their promises. Unlike sources that only give you peak numbers and gains, Building 465 4L Ford Horsepower on the Dyno includes complete before and after dyno graphs so you can see where in the RPM range these parts make or lose the most horsepower and torque. Holdener covers upgrades for 2, 3, and 4 valve modular engines with chapters on throttle bodies and inlet elbows, intake manifolds, cylinder heads, camshafts, nitrous oxide, supercharging, turbocharging, headers, exhaust systems, and complete engine buildups.
