Building Strong Brands David A. Aaker, 2011-11-08 As industries turn increasingly hostile it is clear that strong brand building skills are needed to survive and prosper In David Aaker's pathbreaking book Managing Brand Equity managers discovered the value of a brand as a strategic asset and a company's primary source of competitive advantage Now in this compelling new work Aaker uses real brand building cases from Saturn General Electric Kodak Healthy Choice McDonald's and others to demonstrate how strong brands have been created and managed A common pitfall of brand strategists is to focus on brand attributes Aaker shows how to break out of the box by considering emotional and self expressive benefits and

by introducing the brand as person brand as organization and brand as symbol perspectives The twin concepts of brand identity the brand image that brand strategists aspire to create or maintain and brand position that part of the brand identity that is to be actively communicated play a key role in managing the out of the box brand A second pitfall is to ignore the fact that individual brands are part of a larger system consisting of many intertwined and overlapping brands and subbrands Aaker shows how to manage the brand system to achieve clarity and synergy to adapt to a changing environment and to leverage brand assets into new markets and products Aaker also addresses practical management issues introducing a set of brand equity measures termed the brand equity ten to help those who measure and track brand equity across products and markets He presents and analyzes brand nurturing organizational forms that are responsive to the challenges of coordinated brands across markets products roles and contexts Potentially destructive organizational pressures to change a brand s identity and position are also discussed As executives in a wide range of industries seek to prevent their products and services from becoming commodities they are recommitting themselves to brands as a foundation of business strategy This new work will be essential reading for the battle ready

Aaker on Branding David Aaker, 2014-07-15 *Aaker on Branding* presents in a compact form the twenty essential principles of branding that will lead to the creation of strong brands. Culled from the six David Aaker brand books and related publications, these principles provide the broad understanding of brands, brand strategy, brand portfolios and brand building that all business marketing and brand strategists should know. *Aaker on Branding* is a source for how you create and maintain strong brands and synergistic brand portfolios. It provides a checklist of strategies, perspectives, tools and concepts that represent not only what you should know but also what action options should be on the table. When followed, these principles will lead to strong, enduring brands that both support business strategies going forward and create coherent and effective brand families. Those now interested in and involved with branding are faced with information overload, not only from the Aaker books but from others as well. It is hard to know what to read and which elements to adapt. There are a lot of good ideas out there but also some that are inferior, need updating or are subject to being misinterpreted and misapplied. And there are some ideas that while plausible are simply wrong if not dangerous, especially if taken literally. *Aaker on Branding* offers a sense of topic priorities and a roadmap to David Aaker's books, thinking and contributions. As it structures the larger literature of the brand field, it also advances the theory of branding and the practice of brand management and by extension the practice of business management.
