Handbook of Governance in Small States Lino Briguglio,Jessica Byron,Stefano Moncada,Wouter Veenendaal,2020-12-18 This volume covers a wide

spectrum of governance issues relating to small states in a global context While different definitions of governance are given in the chapters most authors associate governance with the setting and implementation of policies aimed at managing a country or territory and with the related institutional structures and interventions by political actors Generally good governance is associated with concepts such as policy effectiveness accountability transparency control of corruption encouragement of citizens voice and gender equality factors which are in turn linked with democracy What emerges from the book is that the societies of small states are being re shaped by various forces outside their control including the globalization process and climate change rendering their governance ever more complex These problems are not solely faced by small states but small country size tends to lead to a higher degree of exposure to external factors The chapters are grouped into four sections broadly covering political environmental social and economic governance Governance is influenced by many often intertwined factors the division of the book into four parts therefore does not detract from the fact that governance is multifaceted and such division was based on the primary focus of each particular study and its main disciplinary background The expert authors have moreover used a variety of approaches in the studies the subject of small states being well suited to scholarly work from different disciplines using qualitative quantitative and mixed approaches to arrive at useful conclusions

Alloys Marin R. Sullivan, 2022-03-22 A new look at the interrelationship of architecture and sculpture during one of the richest periods of American modern design Alloys looks at a unique period of synergy and exchange in the postwar United States when sculpture profoundly shaped

architecture and vice versa Leading architects such as Gordon Bunshaft and Eero Saarinen turned to sculptors including Harry Bertoia Alexander Calder Richard Lippold and Isamu Noguchi to produce site determined large scale sculptures tailored for their buildings highly visible and well traversed threshold spaces The parameters of these spaces atriums lobbies plazas and entryways led to various designs like sculptural walls ceilings and screens that not only embraced new industrial materials and processes but also demonstrated art s ability to merge with lived architectural spaces Marin Sullivan argues that these sculptural commissions represent an alternate history of midcentury American art Rather than singular masterworks by lone geniuses some of the era s most notable spaces Philip Johnson s Four Seasons Restaurant in Mies van der Rohe s Seagram Building Max Abramovitz s Philharmonic Hall at Lincoln Center and Pietro Belluschi and Walter Gropius s Pan Am Building would be diminished without the collaborative efforts of architects and artists At the same time the artistic creations within these spaces could not exist anywhere else Sullivan shows that the principle of synergy provides an ideal framework to assess this pronounced relationship between sculpture and architecture She also explores the afterlives of these postwar commissions in the decades since their construction A fresh consideration of sculpture s relationship to architectural design and functionality following World War II Alloys highlights the affinities between the two fields and the ways their connections remain with us today **Robotics, AI, and Humanity** Joachim von Braun, Margaret S.
