Buddhism, Cognitive Science, and the Doctrine of Selflessness

Hugh Nicholson,2022-09-30 This book examines the relationship between Buddhist philosophy and scientific psychology by focusing on the doctrine of No self The hypothesis is that No self can function as an instrument of counter induction that is an alternative conceptual scheme that exposes by contrast the intuitive or folk theoretical presuppositions sedimented in our perception of ourselves and others When incorporated into regimens of meditative and ritual practice the No self doctrine works to challenge and disrupt our na ve folk psychology The author argues that there is a fruitful parallel between the No self doctrine and anti Cartesian trends in the cognitive sciences The No self doctrine was the product of philosophical speculation undertaken in the context of hegemonic struggles with both Buddhist and non Buddhist rivals and the classic No self doctrine accordingly is a somewhat schematic and largely accidental anticipation of the current scientific understanding of the mind and consciousness Nevertheless inasmuch as it challenges and unsettles the seemingly self evident certitudes of folk psychology it prepares the ground for the revolution in our self conception promised by the emerging cognitive scientific concept of mind A novel contribution to the study of Buddhist Philosophy the book will also be of interest to scholars of Buddhist Studies and Asian Religions

The Middle Way

Three Pillars of Skepticism in Classical India

Ethan Mills,2018-09-15 Beginning with the earliest strata of Indian philosophy this book uncovers a distinct tradition of skepticism in Indian philosophy through a study of the three pillars of Indian skepticism near the beginning middle and end of the classical era Nagarjuna c 150 200 CE Jayarasi c 770 830 CE and Sri Har a c 1125 1180 CE Moving beyond the traditional school model of understanding the history of Indian philosophy this book argues that the philosophical history of India contains a tradition of skepticism about philosophy represented most clearly by three figures coming from different schools but utilizing similar methods Nagarjuna Jayarasi and Sri Har a This book argues that there is a category of skepticism often overlooked by philosophers today skepticism about philosophy varieties of which are found not only in classical India but also in the Western tradition in Pyrrhonian skepticism Skepticism about philosophy consists of intellectual therapies for those afflicted by the quest for dogmatic beliefs The book begins with the roots of this type of skepticism in

ancient India in the g Veda Upani ads and early Buddhist texts Then there are two chapters on each of the three major figures one chapter giving each philosopher s overall aims and methods and a second demonstrating how each philosopher applies these methods to specific philosophical issues The conclusion shows how the history of Indian skepticism might help to answer philosophy s detractors today while skeptics demonstrate that we should be modest about philosophy s ability to produce firm answers philosophy nonetheless has other uses such as cultivating critical thinking skills and lessening dogmatism This book is situated within a larger project of expanding the history of philosophy Just as the history of Western philosophy ought to inform contemporary philosophy so should expanding the history of philosophy to include classical India illuminate understandings of philosophy today its value limits and what it can do for us in the 21st century *Models of Understanding Text* Bruce K. Britton, Arthur C. Graesser, 2014-02-25 What is text understanding It is the dynamic process of constructing coherent representations and inferences at multiple levels of text and context within the bottleneck of a limited capacity working memory The field of text and discourse has advanced to the point where researchers have developed sophisticated models of comprehension and identified the particular assumptions that underlie comprehension mechanisms in precise analytical or mathematical detail The models offer a priori predictions about thought and behavior not merely ad hoc descriptions of data Indeed the field has evolved to a mature science The contributors to this volume collectively cover the major models of comprehension in the field of text and discourse Other books are either narrow covering only a single theoretical framework or do not focus on systematic modeling efforts In addition this book focuses on deep levels of understanding rather than language codes syntax and other shallower levels of text analysis As such it provides readers with up to date information on current psychological models specified in quantitative or analytical detail **Constructing Tibetan Culture** Frank J. Korom, 1997 **The Life of My Teacher** Dalai Lama XIV Bstan-'dzin-rgya-mtsho, 2017-07-11 The Sixth Ling Rinpoche 1903-83 was a towering figure in Tibetan Buddhism Combining great learning with great humility he was ordained by the Thirteenth Dalai Lama and went on to serve as the head of the Geluk tradition and as the senior tutor to the present Dalai Lama In temperament and wisdom he had a profound influence on the Dalai Lama s spiritual development and he became a steady presence for His Holiness during the chaotic changes that defined the Tibetan experience of the twentieth century with the invasion of their country by Communist forces and the subsequent rebuilding of their culture in India Ling Rinpoche s extensive travels among exiled communities abroad and across India buoyed the spirits of the Tibetan diaspora and the training and activities of this consummate Buddhist master here told by the Dalai Lama in the traditional Tibetan style will inspire and amaze **Resources in Education** , 1996
